Our Projects

Robust Company Systems

We use our know-how to build robust systems for large companies: whether they need it for management, connecting various departments, or building the loyalty of their customers.

We have expertise in working with integrations, and we can bring digitalization even to companies with a large number of processes.

FERRERO

UX | UI | Portfolio Management System | Integration

Portfolio Management System

We have developed a single operation management system that works across many departments to manage the company's whole product range. Our solution works as a central hub, interconnecting data from various different systems in the company.

The screenshot displays the Ferrero Portfolio Management System interface. The top navigation bar includes the Ferrero logo and a menu icon. The left sidebar contains navigation options: PORTFOLIO, P&L CARDS (with a red notification badge), IMPORTS, and EXPORTS. The main content area shows details for product #77123456, 'K. Chocolate T8x10x4', with a sub-identifier 'CY20-21, XCZ1107400, Kinder Chocolate 100G'. Below this, there are tabs for Overview, IDs & Names, Specification, Logistics, Timing (selected), BOM Components (6), P&L Card (None), and Media files (3). The 'Timing & periods overview' section features a table with sell-in, in-store, and DF dates for three periods, all set to 1.12.2020 - 31.12.2020. A 'TO BE PLANNED IN ADVANCE' section indicates a 12-week lead time. The bottom part of the overview is a Gantt chart for 'CY 2020 - 2021' spanning from October 2019 to January 2020. The chart tracks various milestones: Sell-in #1, #2, #3; In-Store #1, #2, #3; and DF Date #1, #2, #3, each represented by horizontal bars of different colors (brown, grey, yellow) indicating their duration.

GATE

UX | UI | Prototype | E-Commerce | Fashion

Loyalty System For A Fashion Company

Our CRM enables the management of customer benefits in more than 130 stores, 5 countries and 5 online shops. Through the integration of ERP and an online shopping system, it manages and tracks the activities of 400,000+ customers. This gives the company completely unique opportunities to individually target every client.

UX | UI | Web | Android | iOS | HR

Human Resource System For A Saudi Company

For PalmHR, we have created an elaborate and powerful SaaS HR software solution, now used by several companies.

www.palmhr.net

Applications For Control And Monitoring

We have long-term experience with building applications that control and monitor hardware, collect and analyze data, and apply AI to achieve a relevant response.

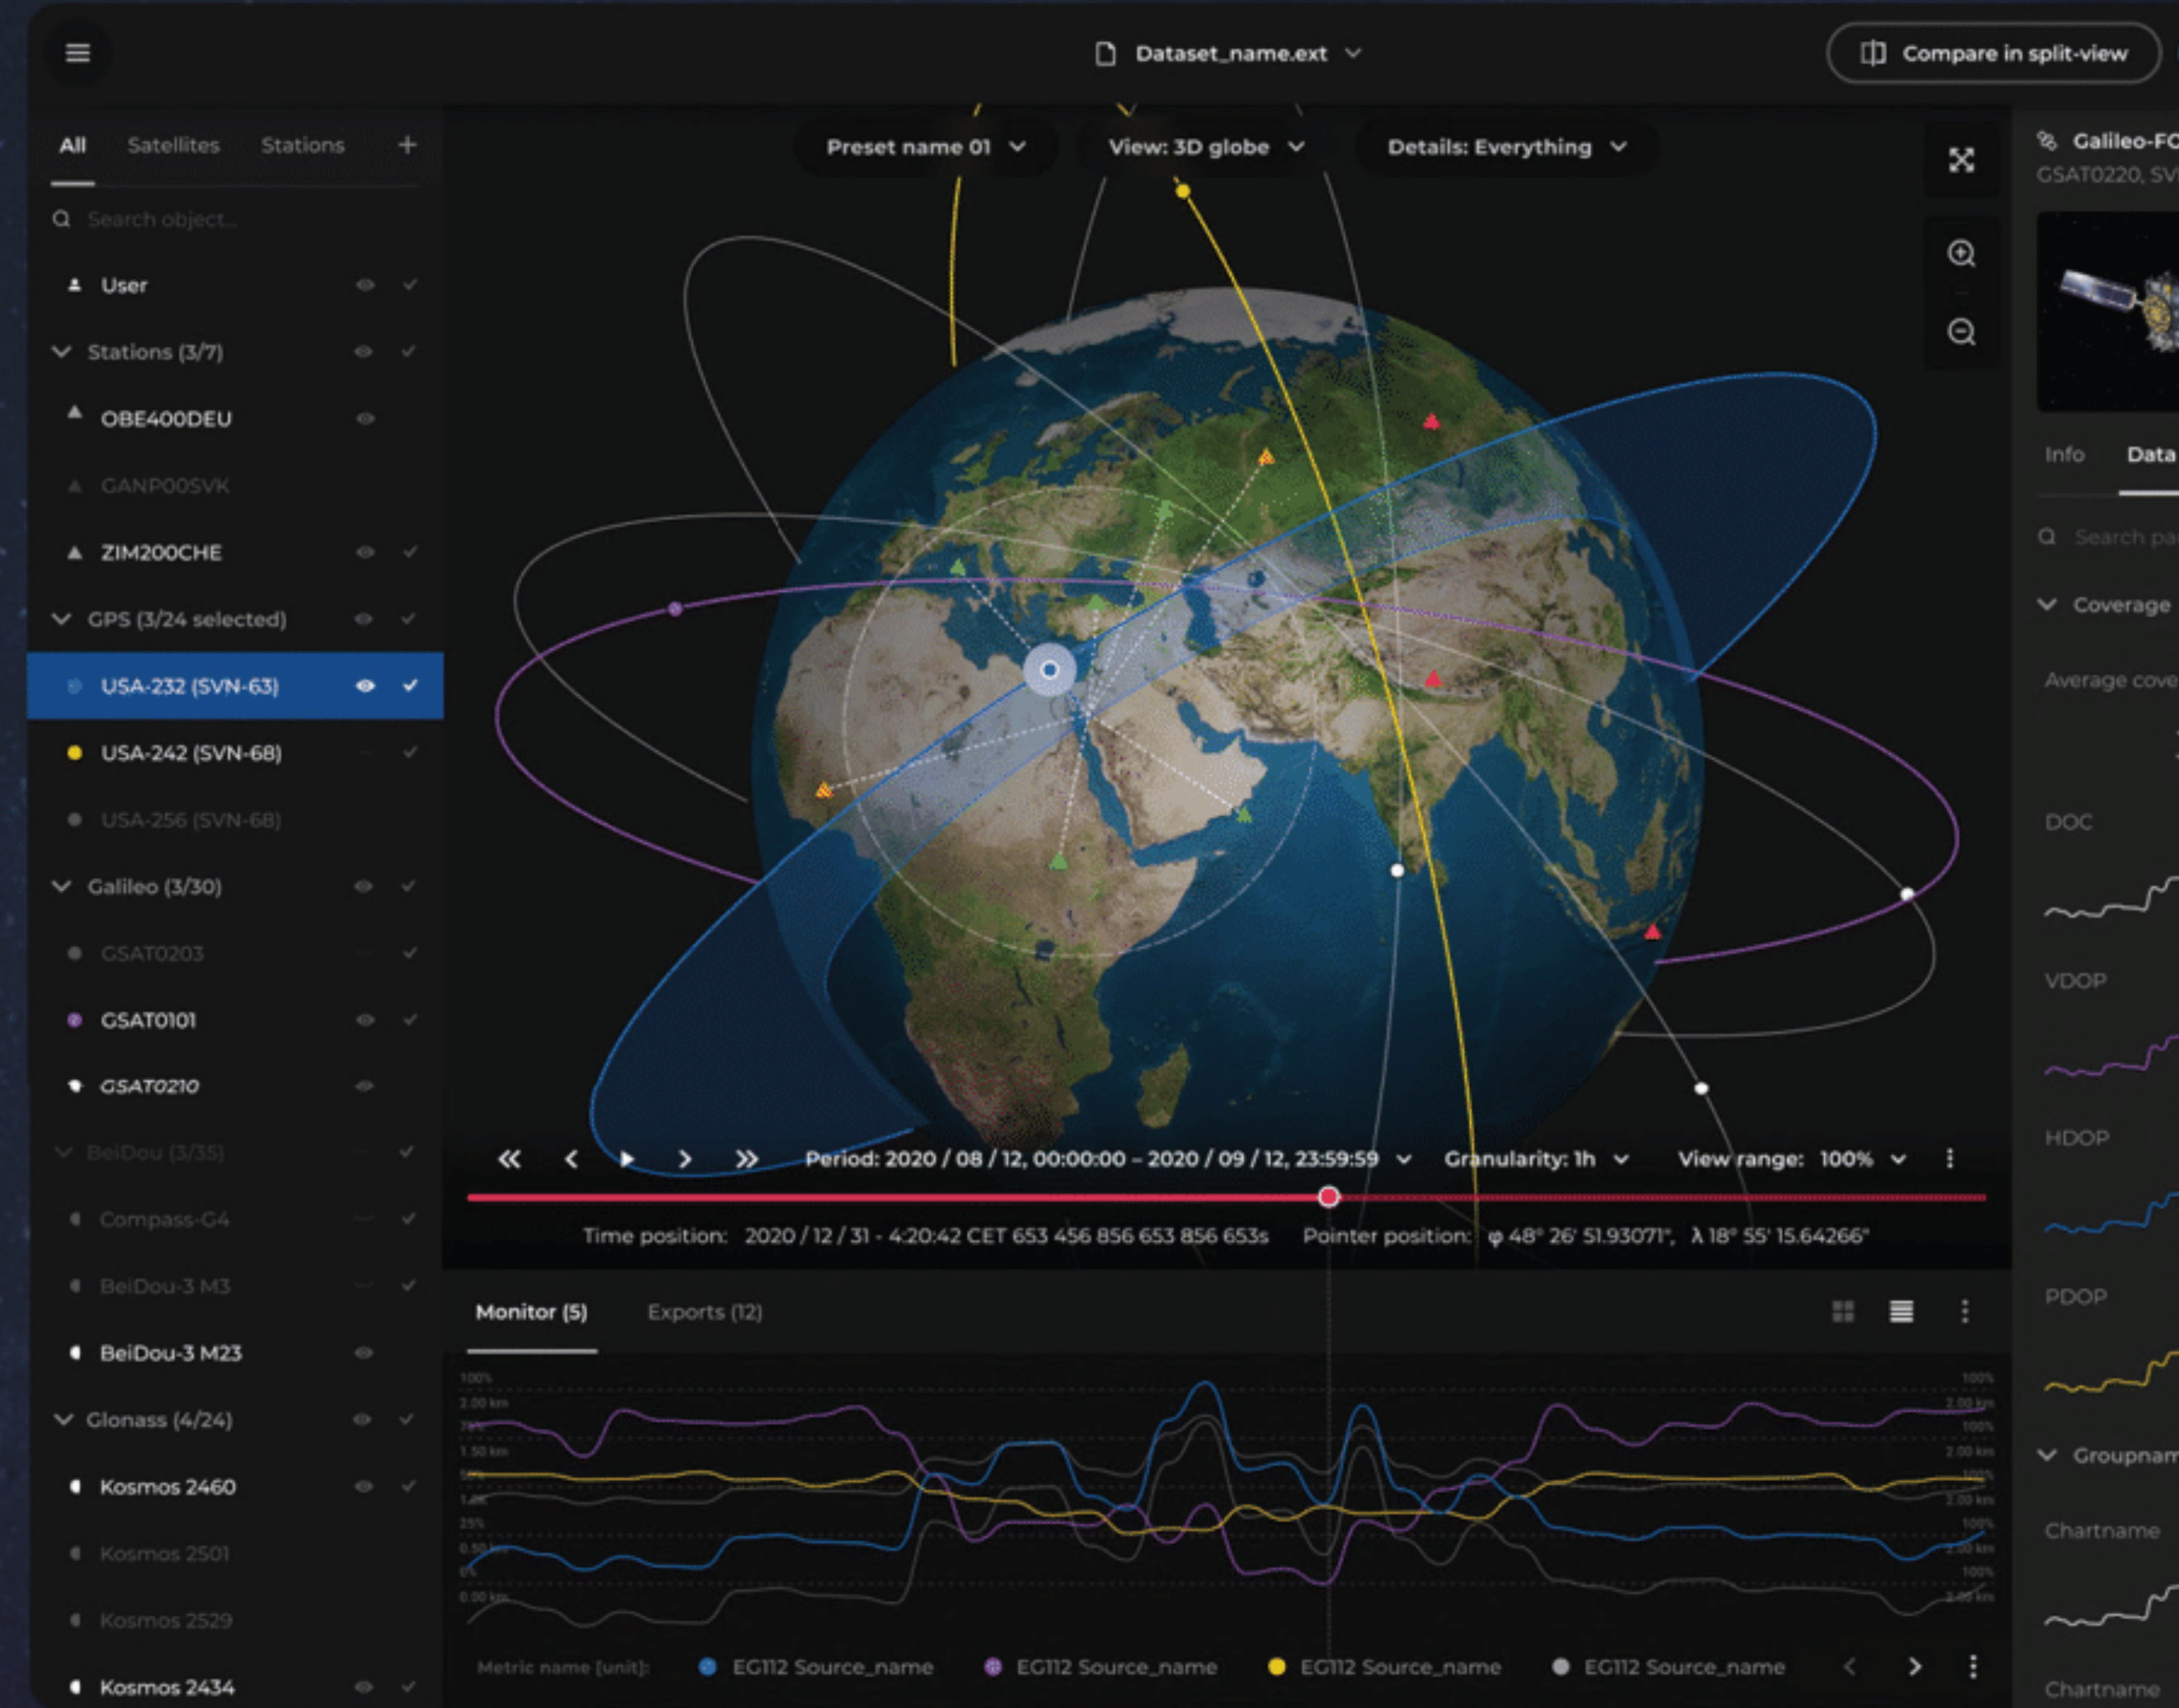

Web App | Satellite | Space Industry

SBAS Geometry Analysis Tool

We are developing a comprehensive toolset that enables SBAS* engineers, researchers, and operators to carry out analyses of orbit and ionospheric geometries between SBAS ground stations and the constellation of satellites.

*Satellite-Based Augmentation System

UX | UI | Android | Dentistry

Innovative Software Tailored To The Needs Of Dentists

The software ensures effortless navigation, controls the adjustment of handpieces, electro-pneumatic brakes and the unit's parameters, such as the chair's movement or the position of light.

AR App - A Sales Tool For Dental Chairs

Using AR technology, dentists can view a life-sized 3D model of the chair in their dental office in order to choose the right model.

Digital Assistant For Service Technicians

A simple application helps technicians to file damage reports to manufacturers, increasing the efficiency of the entire process and minimizing errors.

SCHEIDT&BACHMANN 

KASYE[®]

Software | SAP | Integration | Logistics

Integration of Hänel Lean-Lift system with SAP

We have integrated the Hänel Lean-Lift robotized warehouse system with the SAP ERP system. By creating software that manages the control of the lift easily, we optimized logistics and reduced handling time.

Hänel LEAN-LIFT

Real-Estate Web Portals

We have become the go-to company for real-estate web portals. We understand that great architecture needs a great presentation.

The portals are focused on user experience and have an optimized design so that the customers receive all relevant information. At the same time, customers are lead deeper into the sales process.

UX | UI | Web Portal | Real Estate

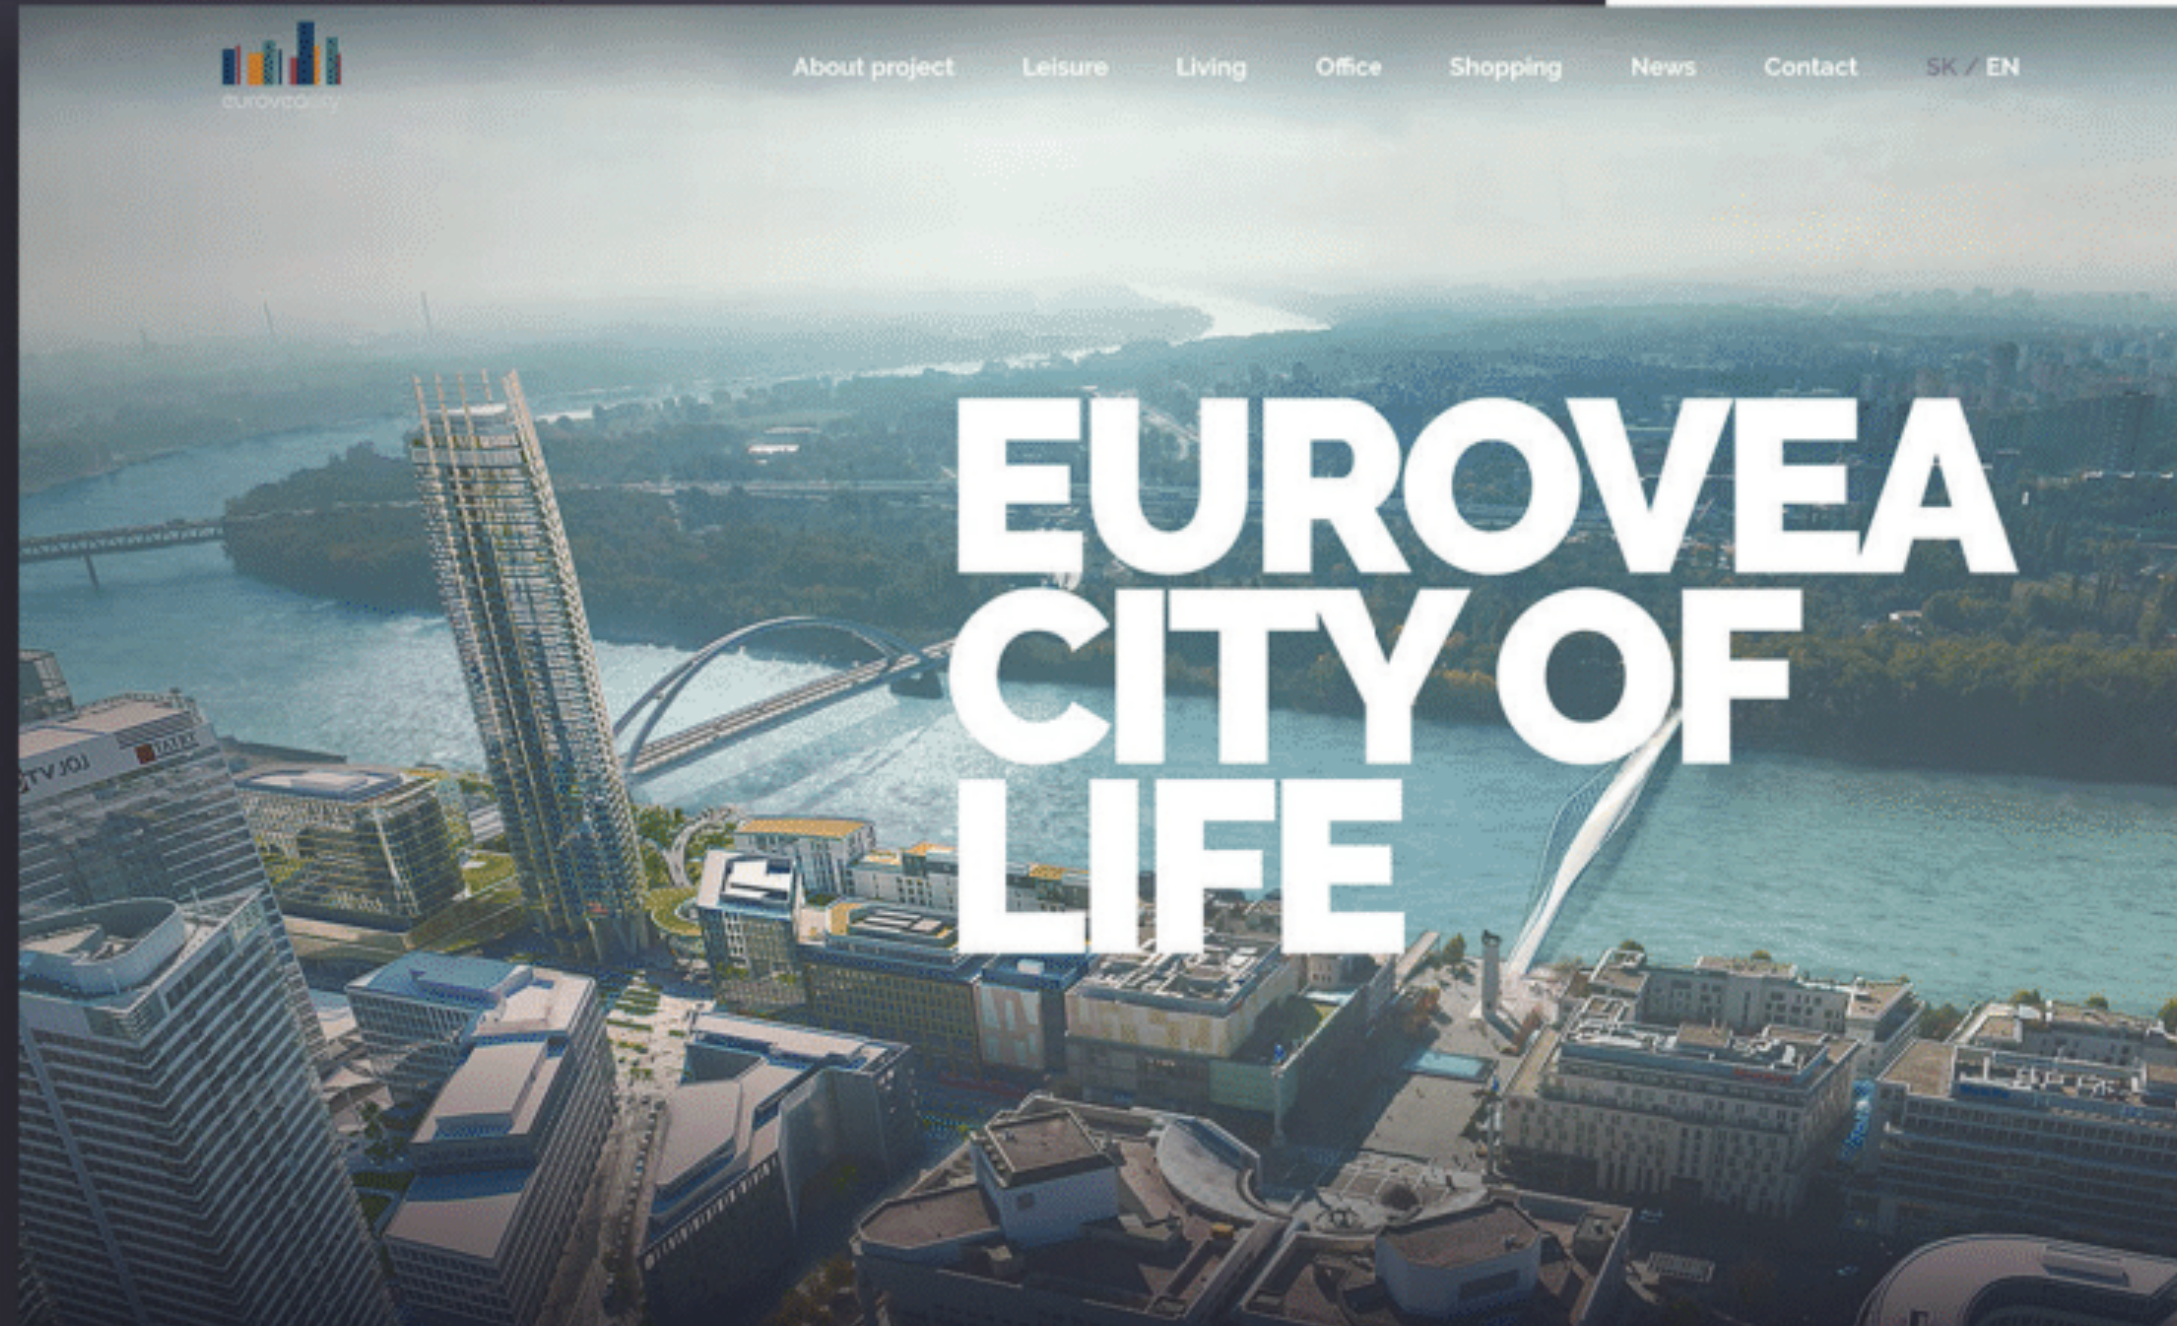

Tailor-made website for Bratislava's leisure and shopping complex

We have designed & developed a presentation website for a state-of-the-art city district development in Bratislava.

www.euroveacity.com

This city quarter's exceptional location delivers zestful synergy - insightful infrastructure, amenities, and relaxation zones bring a refreshing new quality of life to this popular European city.

Pribina House

01 / 02

byty@euroveacity.sk
+421 2 5941 8855

Office space with added value – unique architecture, comfortable interiors, perfect services, and breathtaking views of this vibrant exciting place. The Eurovea City locality is the most dynamically-growing quarter in Bratislava, and is fast becoming a renowned European centre for business.

EUROVEA TOWER
eurovea.sk

UX | UI | Development | Real Estate

Interactive Website For Slovakia's First Skyscraper

We worked with a local sales and marketing team to develop a custom website for Slovakia's first skyscraper and a ground-up development on the Danube River.

www.euroveatower.com

168

Bratislava's iconic skyline will be complemented by a welcome new addition – the 168-metre Eurovea Tower, Slovakia's very first skyscraper.

With an imaginative and elegant design based on gentle curves, the refined beauty of Eurovea tower will become a dignified urban counterpoint to the landmark grandeur of Bratislava Castle. The tower's beautiful silhouette will be accentuated with an interplay of light and shade by day, and subtle lighting by night – its inspiring views will include the emerging Eurovea City district and the Danube riverside.

RIVERSIDE

UX | UI | Development | Real Estate

Interactive Website For A New Residential Development

We worked in conjunction with a local sales and marketing team to develop a custom website for a ground-up residential development on the Danube river.

www.euroveariverside.com

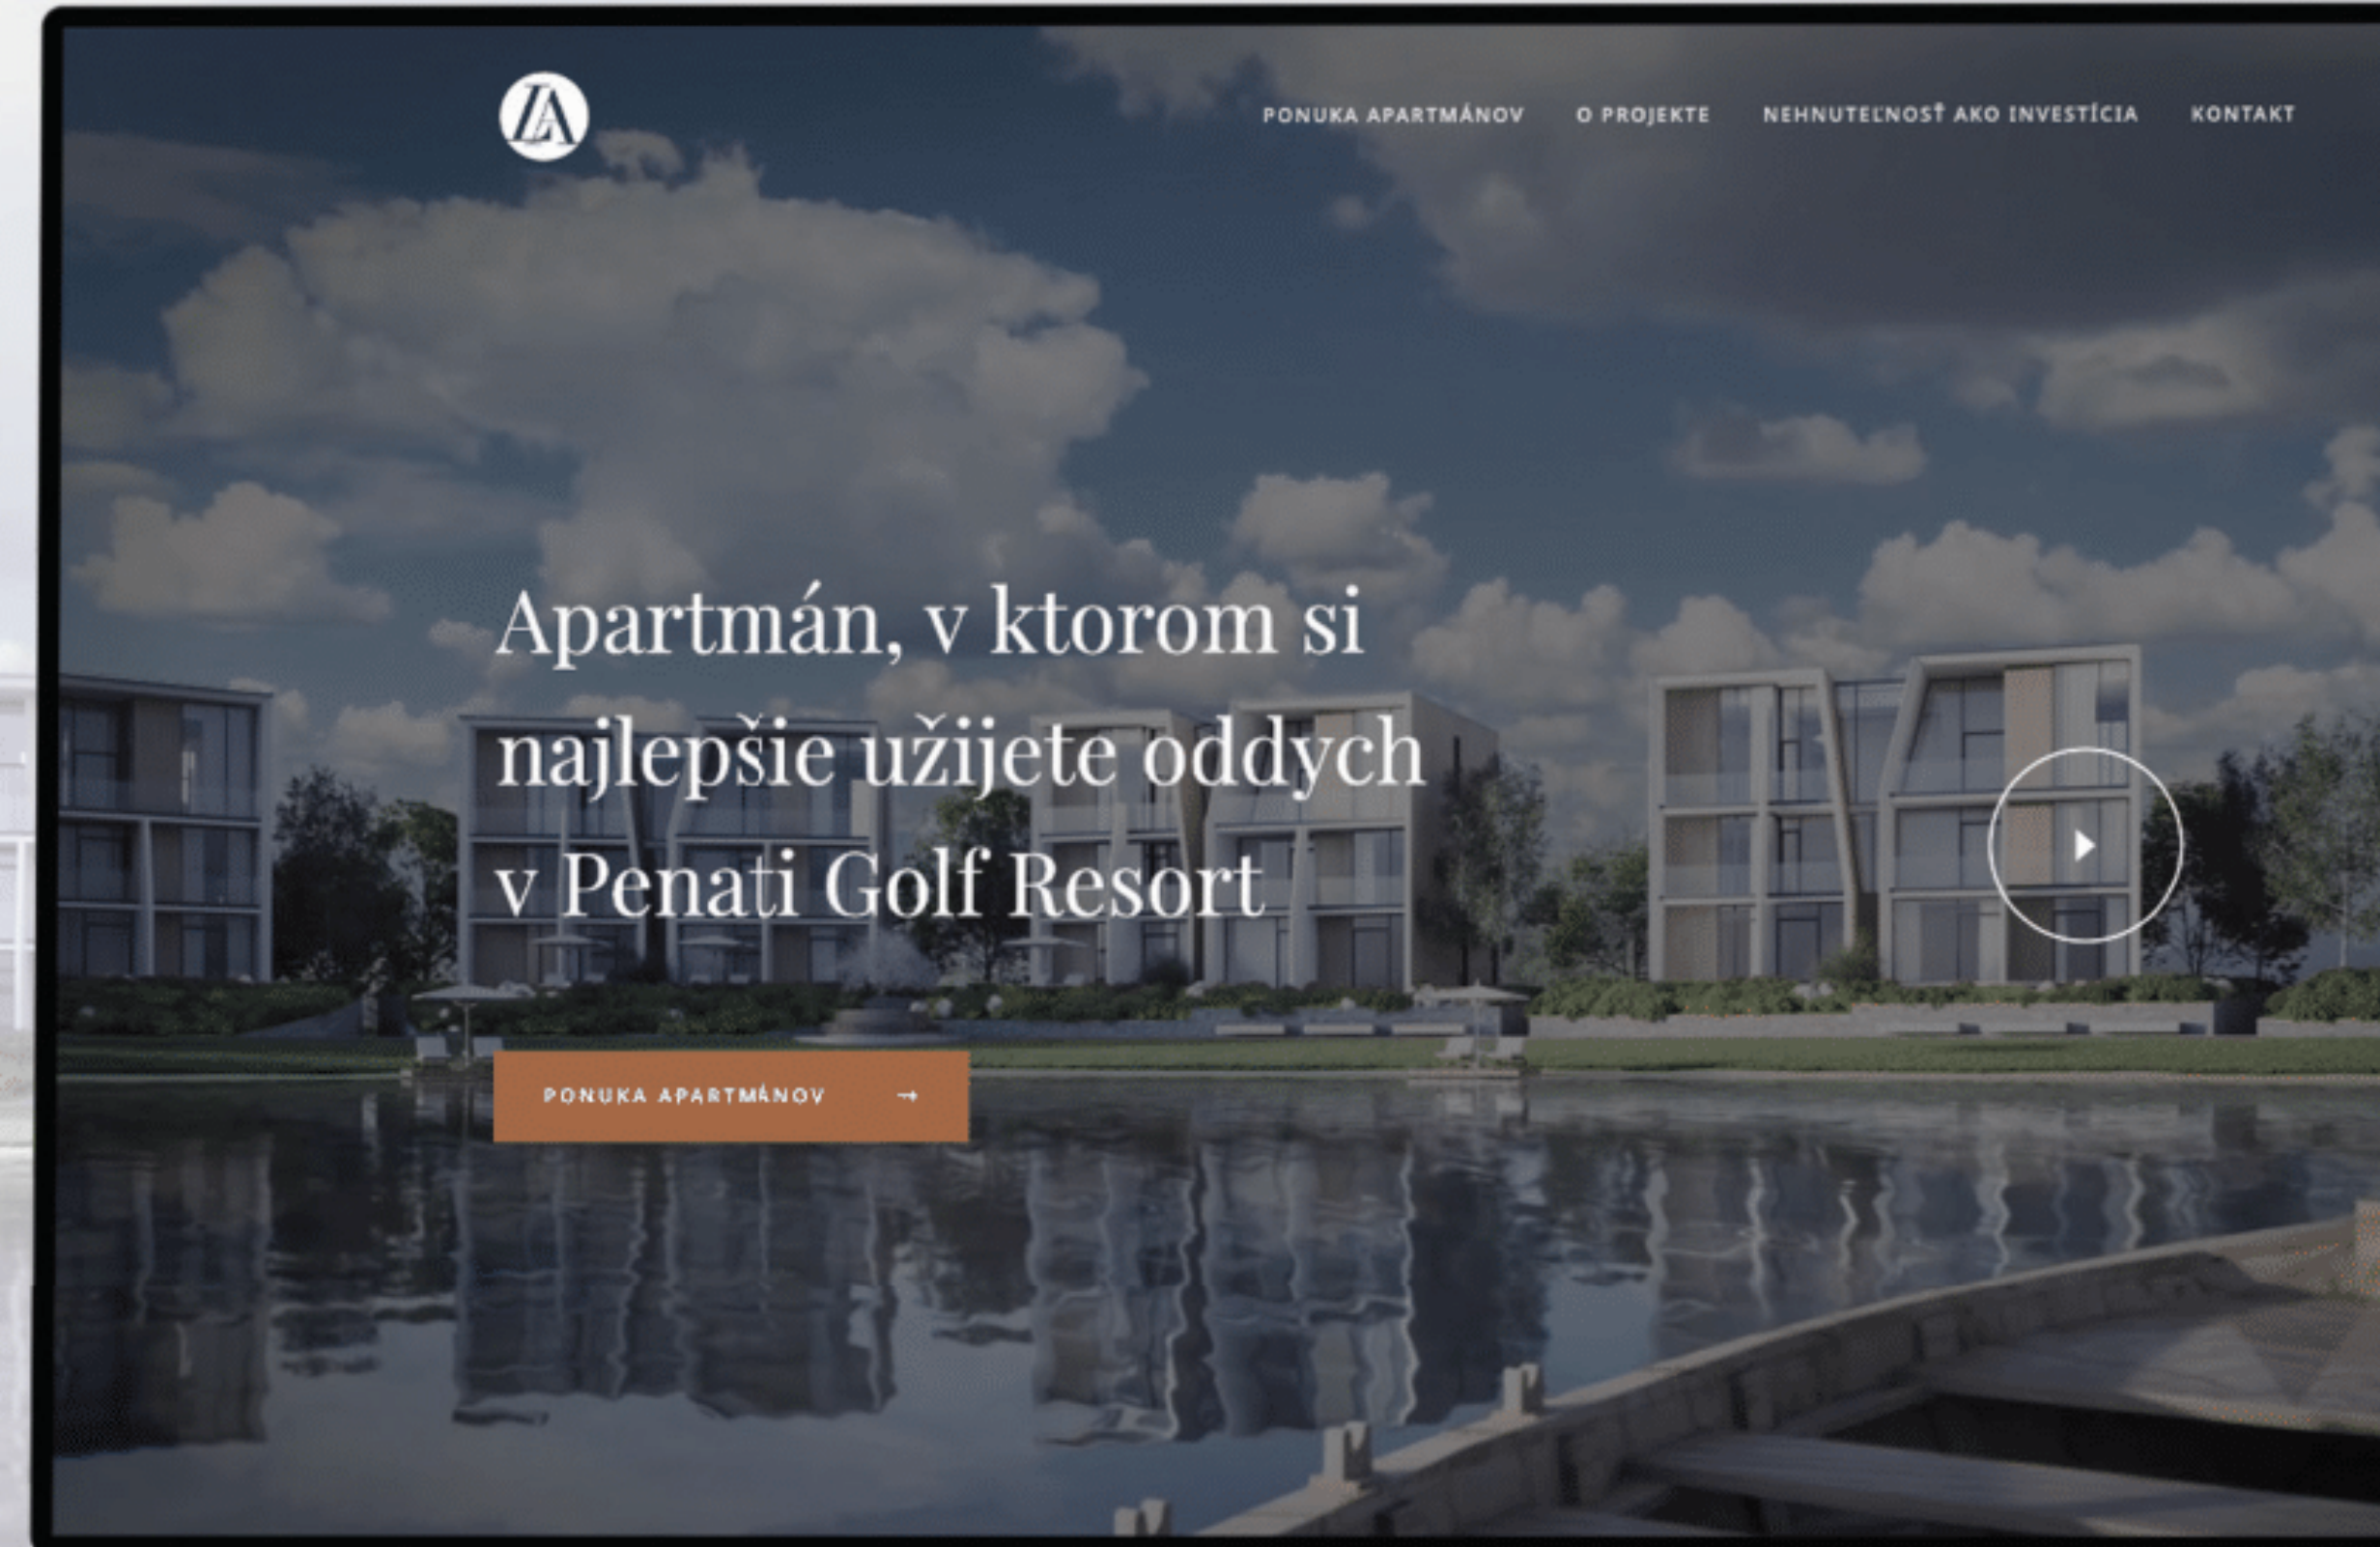

UX | UI | Web Portal | Real Estate

A Stylish Real Estate Web Portal

The web portal for LuxApartments is very easy to navigate and offers detailed information about the apartments. A clear information structure and simple design works to guide the visitors in their sale process. All of this accompanied by an esthetically pleasing color palette.

www.luxapartments.sk

Augmented Reality Applications

We love to create augmented reality (AR) for our clients since it is one of the best tools to elicit a direct emotional response from their customers.

The AR applications are mostly used to support sales and PR or help with education.

ECOCAPSULE

AR | UX | UI | Android | iOS

AR App For A Self-Sustainable Microhome

The app enables potential buyers to place a life-sized model of the Ecocapsule anywhere in a real environment and take a look inside, experience the dimensions, and check out the facilities. This facilitates the sales process significantly.

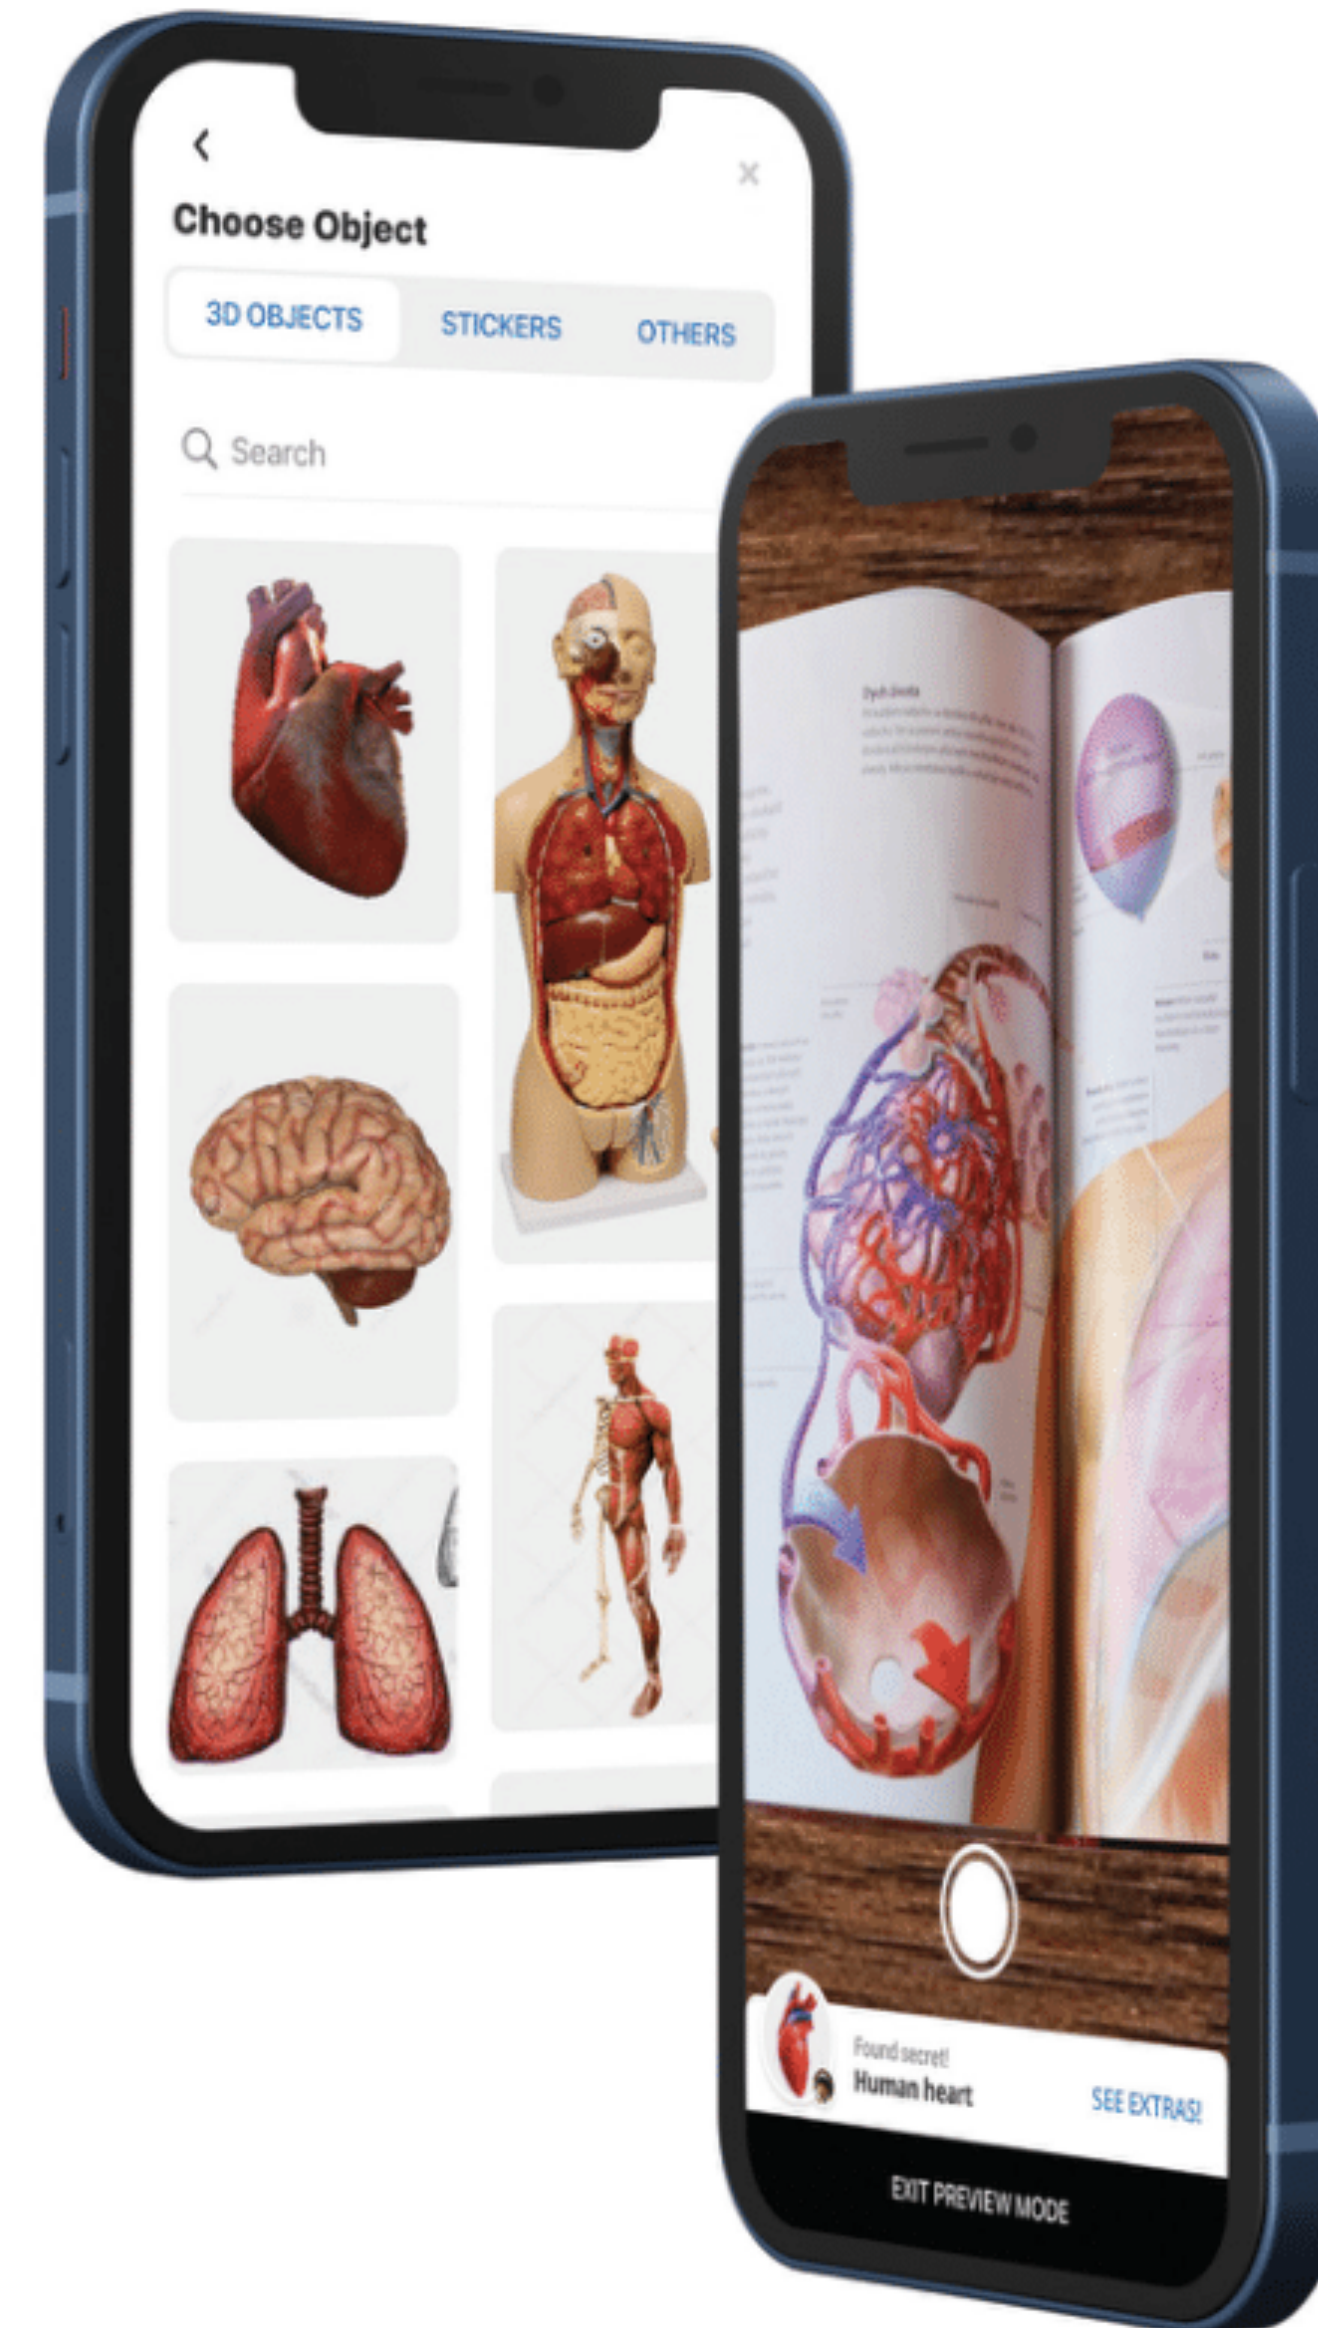

AR | UX | UI | Android | iOS

The Future Of Learning

KLARA is an augmented reality app created by our EdTech division Soficreo. Using KLARA, educators have the ability to place 3D objects chosen from a library onto a variety of surfaces: textbooks, walls, or websites.

www.soficreo.com/klara

GreenChem

AR | 3D | Prototyping | Gastronomy

AR App For Producer And Distributor Of AdBlue

This augmented reality app helps sales representatives to showcase life-sized 3D models of their AdBlue filling systems at a particular place. The app also creates price offers.

Zetor

AR | 3D Animation | Engineering

AR Tractor For HTC Holding

An augmented reality app that enhances the presentation brochure of HTC Holding, with animations of a Zetor tractor, ball bearing, and more.

Education And Communication Platforms

We value education because we understand that our future depends on it. That's why we create educational apps as part of our product portfolio as well as for other institutions.

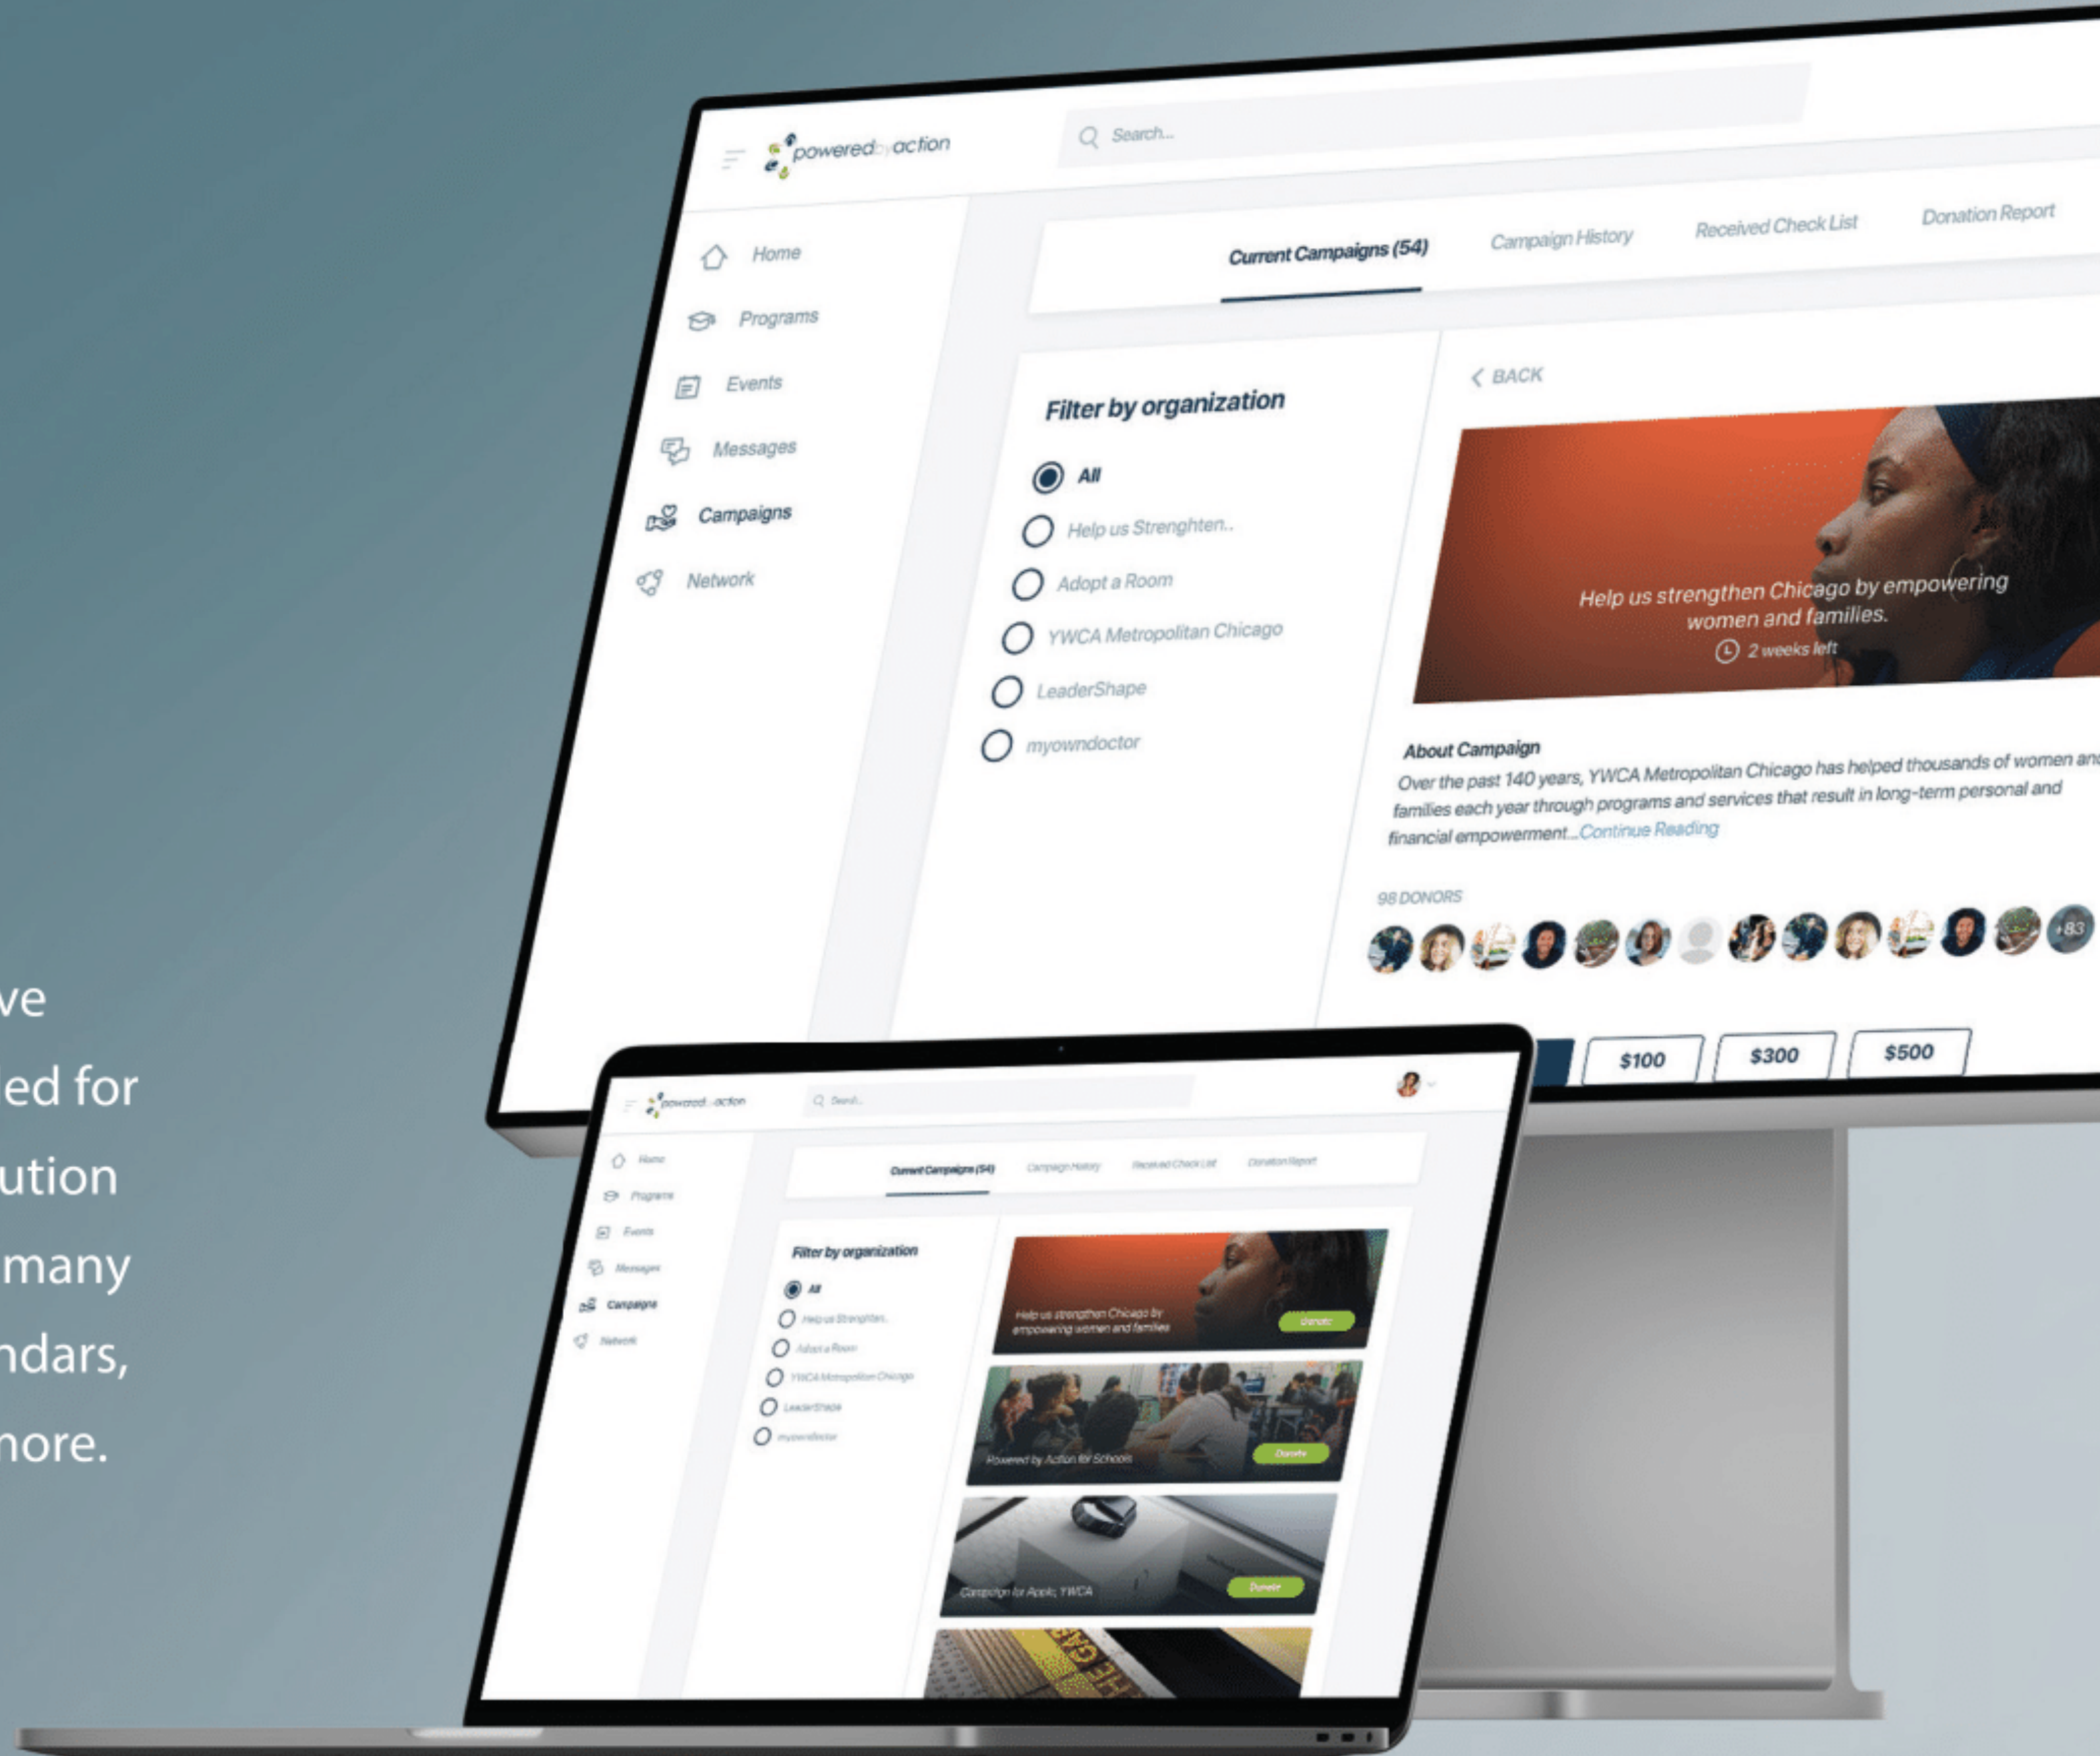

We also have experience with the development of communication applications. These are very important for the sharing of information, whether in companies or NGOs.

UX | UI | iOS | Android | Web App | Communication

A Robust Community Platform For NGOs

For the US organization Powered by Action, we have developed a community platform for NGOs intended for communication, sharing, and cooperation. The solution includes both a mobile app and a web portal with many functions: sharing of articles, videos, pictures, calendars, polls, workshops, training, campaigns, and much more.

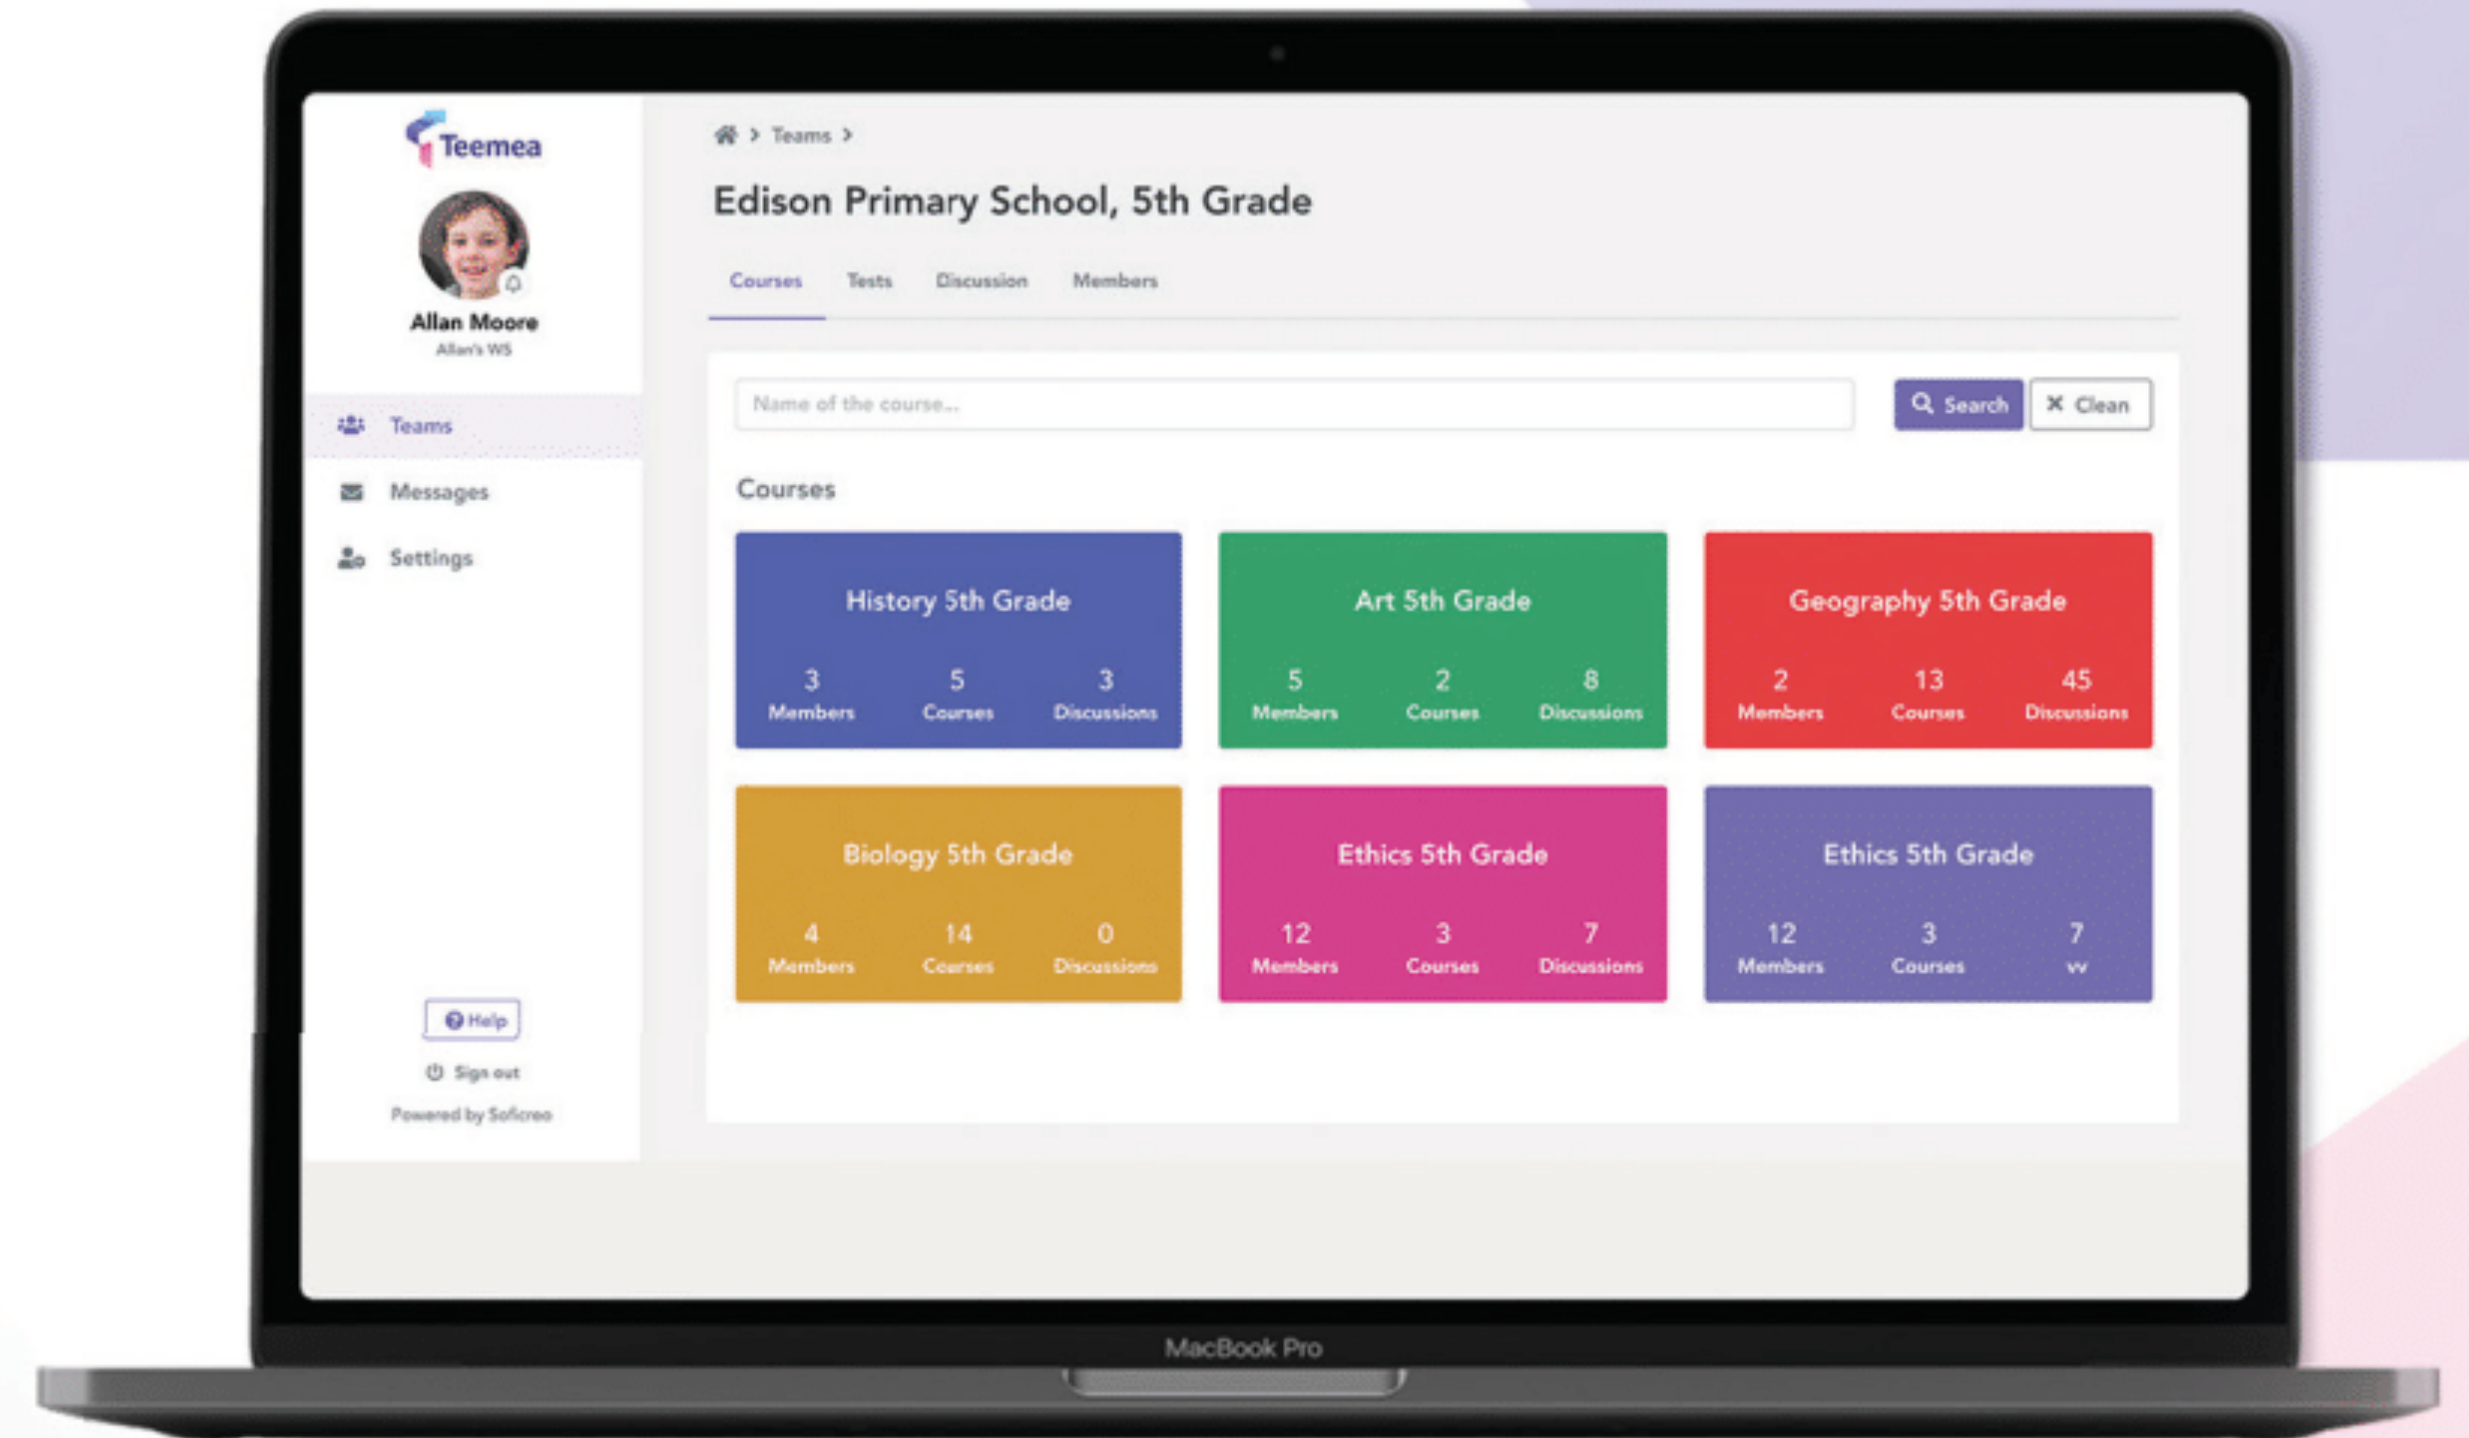

EdTech | Web App | Educational Platform

Education Platform For Companies

Teemea for Businesses is the perfect tool for small, medium, and large enterprises that need to improve their skills or learn new ones. It works very well as an onboarding tool for new employees. The app is the pioneer product of Soficreo, Touch4IT's new EdTech division.

www.teemea.com

UX | UI | iOS | Android | Education

Native App For SMOPAJ Museum

This is a promotional app focusing on exhibitions and collection items in the Slovak Museum of Nature Protection and Speleology. The app also educates on various environmental topics.

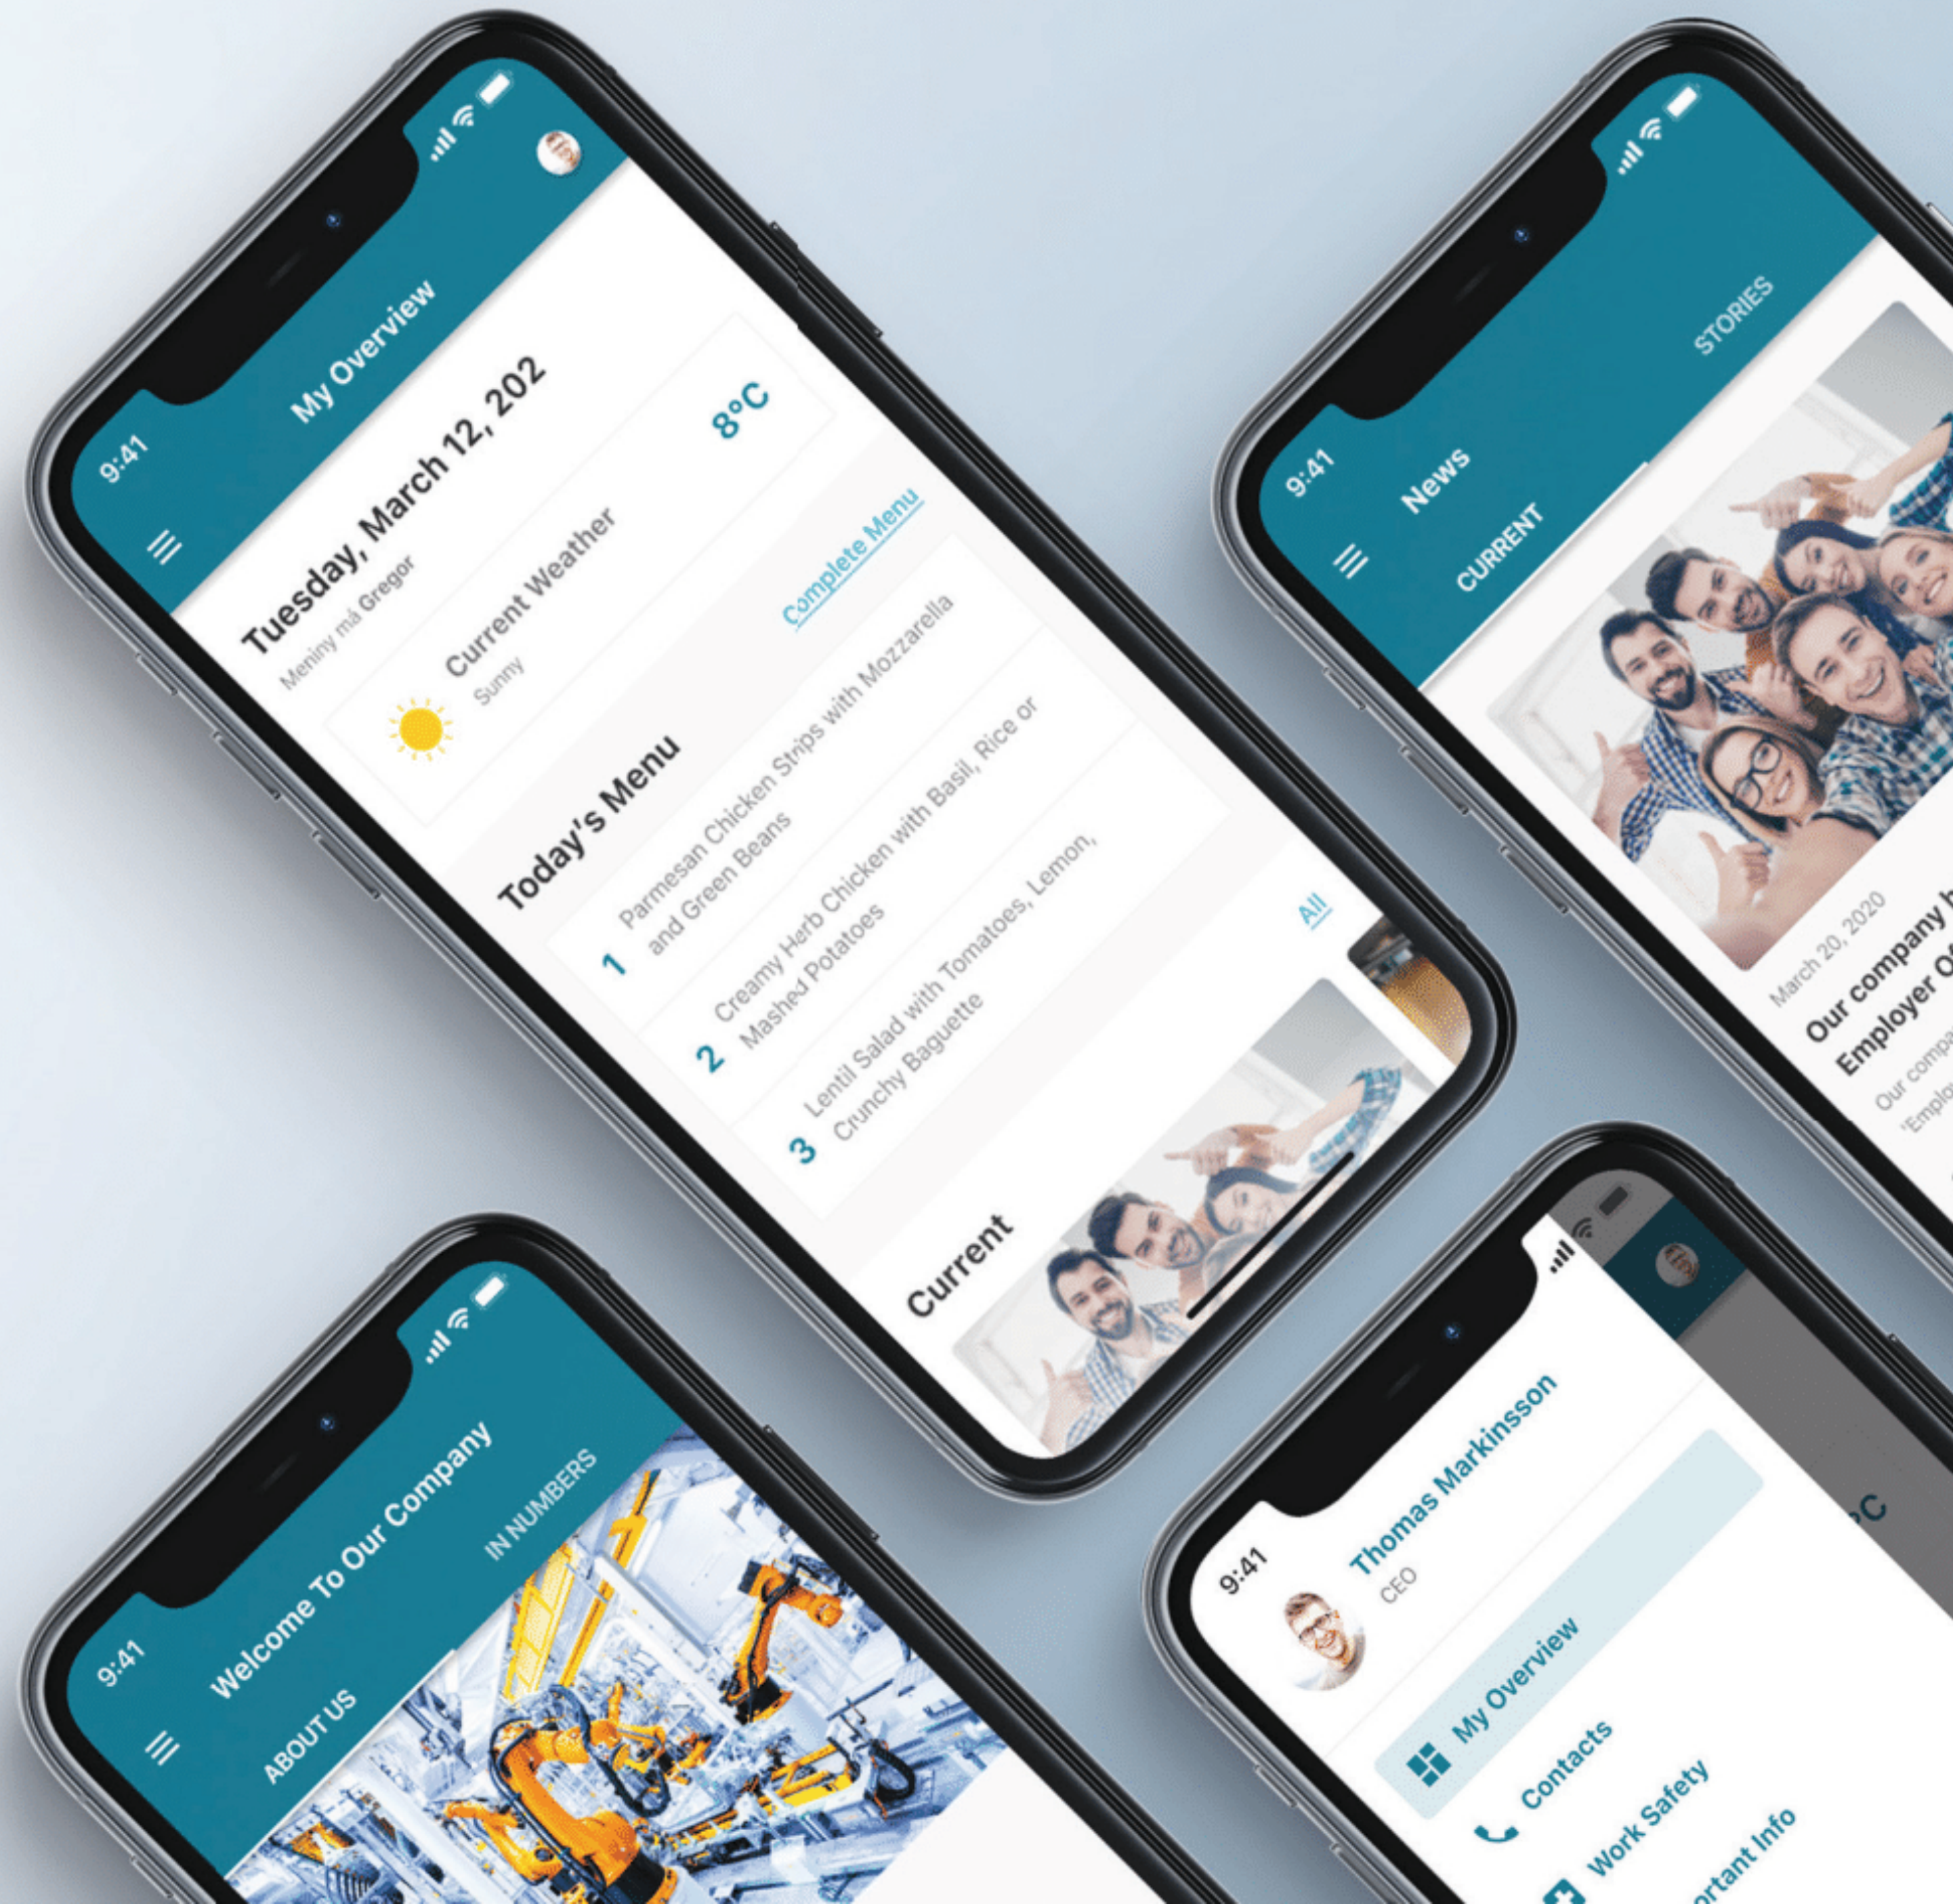

UX | UI | iOS | Android | SaaS | HR

Mobile App For Internal Communication

This app helps to communicate with your employees quickly. It informs and engages associates more efficiently and boosts employee loyalty in your company. The app can be easily adjusted to your brand identity and any specific needs.

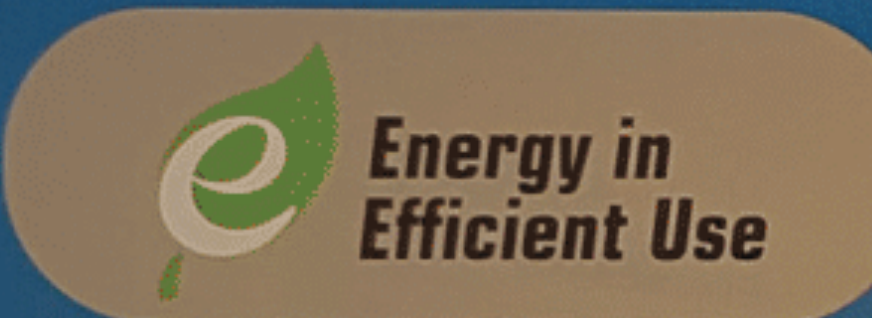

iOS | AR | Education

Employee Onboarding Tool

The app for TESLA Liptovský Hrádok uses gamification to simplify the educational onboarding process for new employees. It teaches employees to work with the machines quickly and optimize the educational process.

Other Applications

We have worked on a variety of other applications and projects. Our primary goal is always to help our clients improve their business, save their finances, and bring them closer to the future.

Competition Website | Security

Development Of A Campaign Website

For Coca-Cola, we created a competition website where customers could win various prizes using bottle codes. In this case, we were responsible for the web development, complete logic, and security of the whole contest system.

UX | UI | Native App | Pharma

Solution For Search And Price Calculation Of Medicines

The native app we have created for Pharm-In Apps is a robust system with a smart and intuitive design. It enables pharmacists, pharmaceutical companies, and distributors instant access to a large database of medicines and detailed information regarding price development, as well as a price calculator.

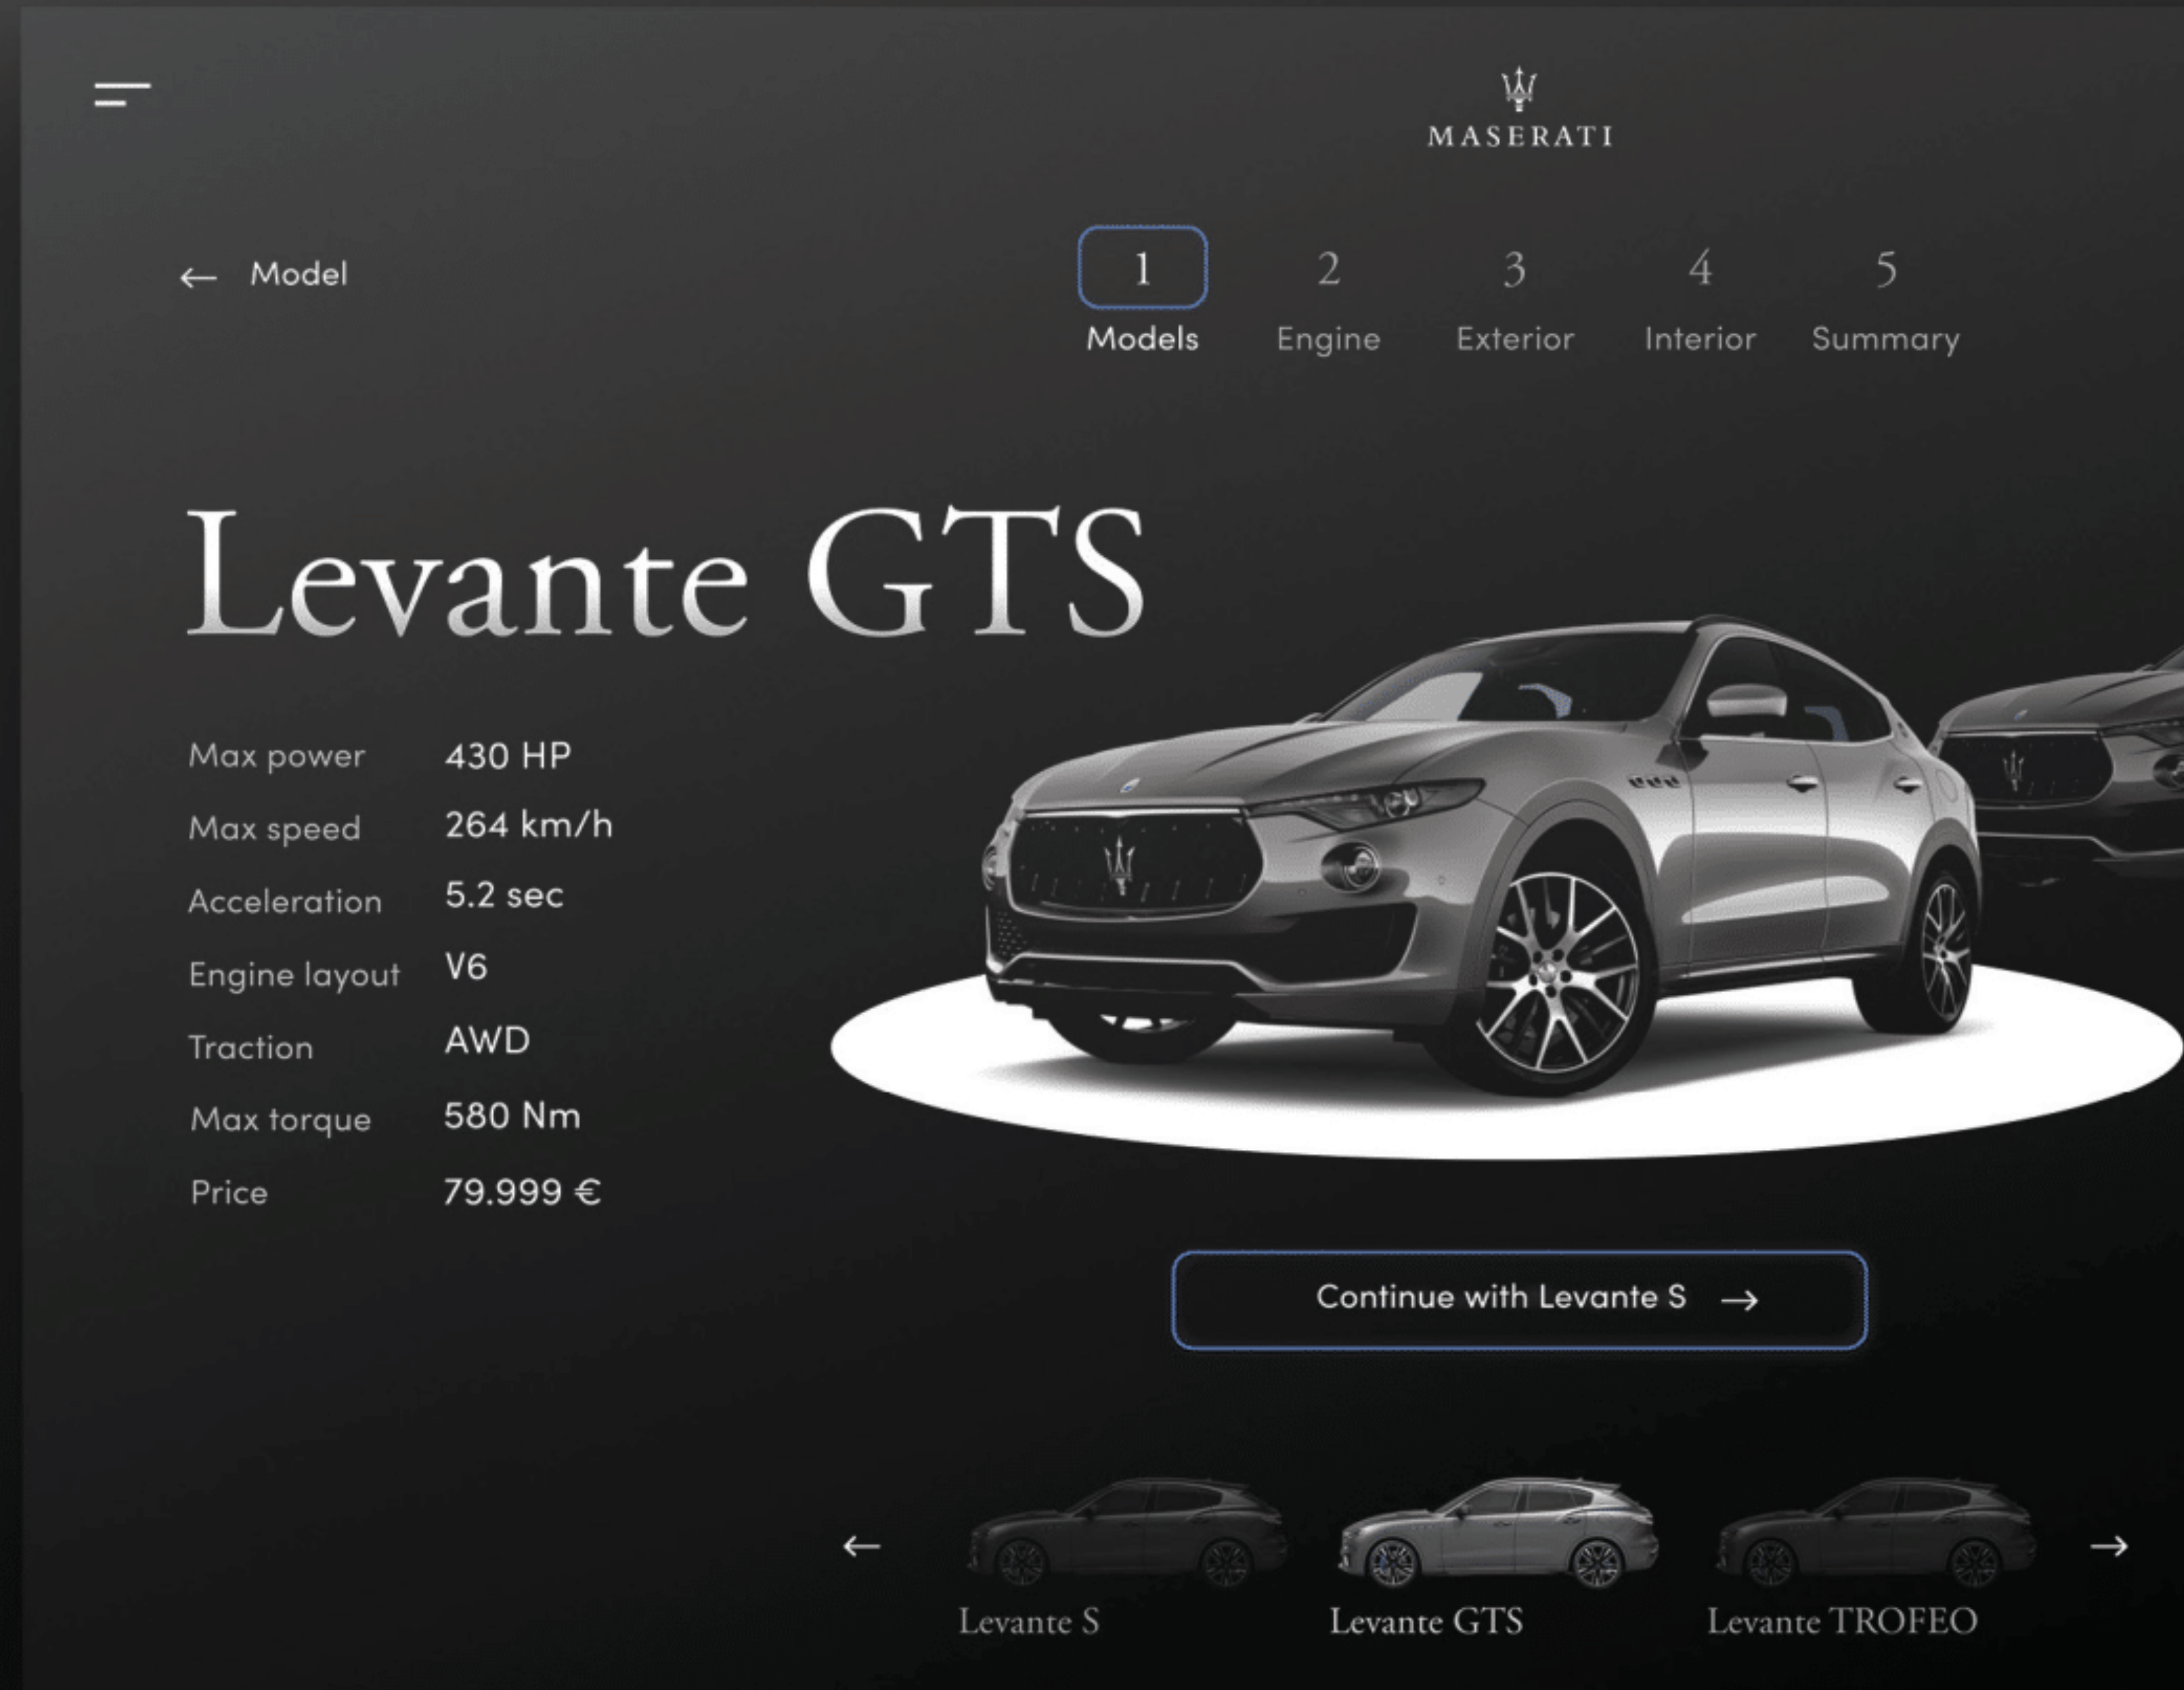

3D Design | VR | Unity | Automotive

Interactive Car Configurator

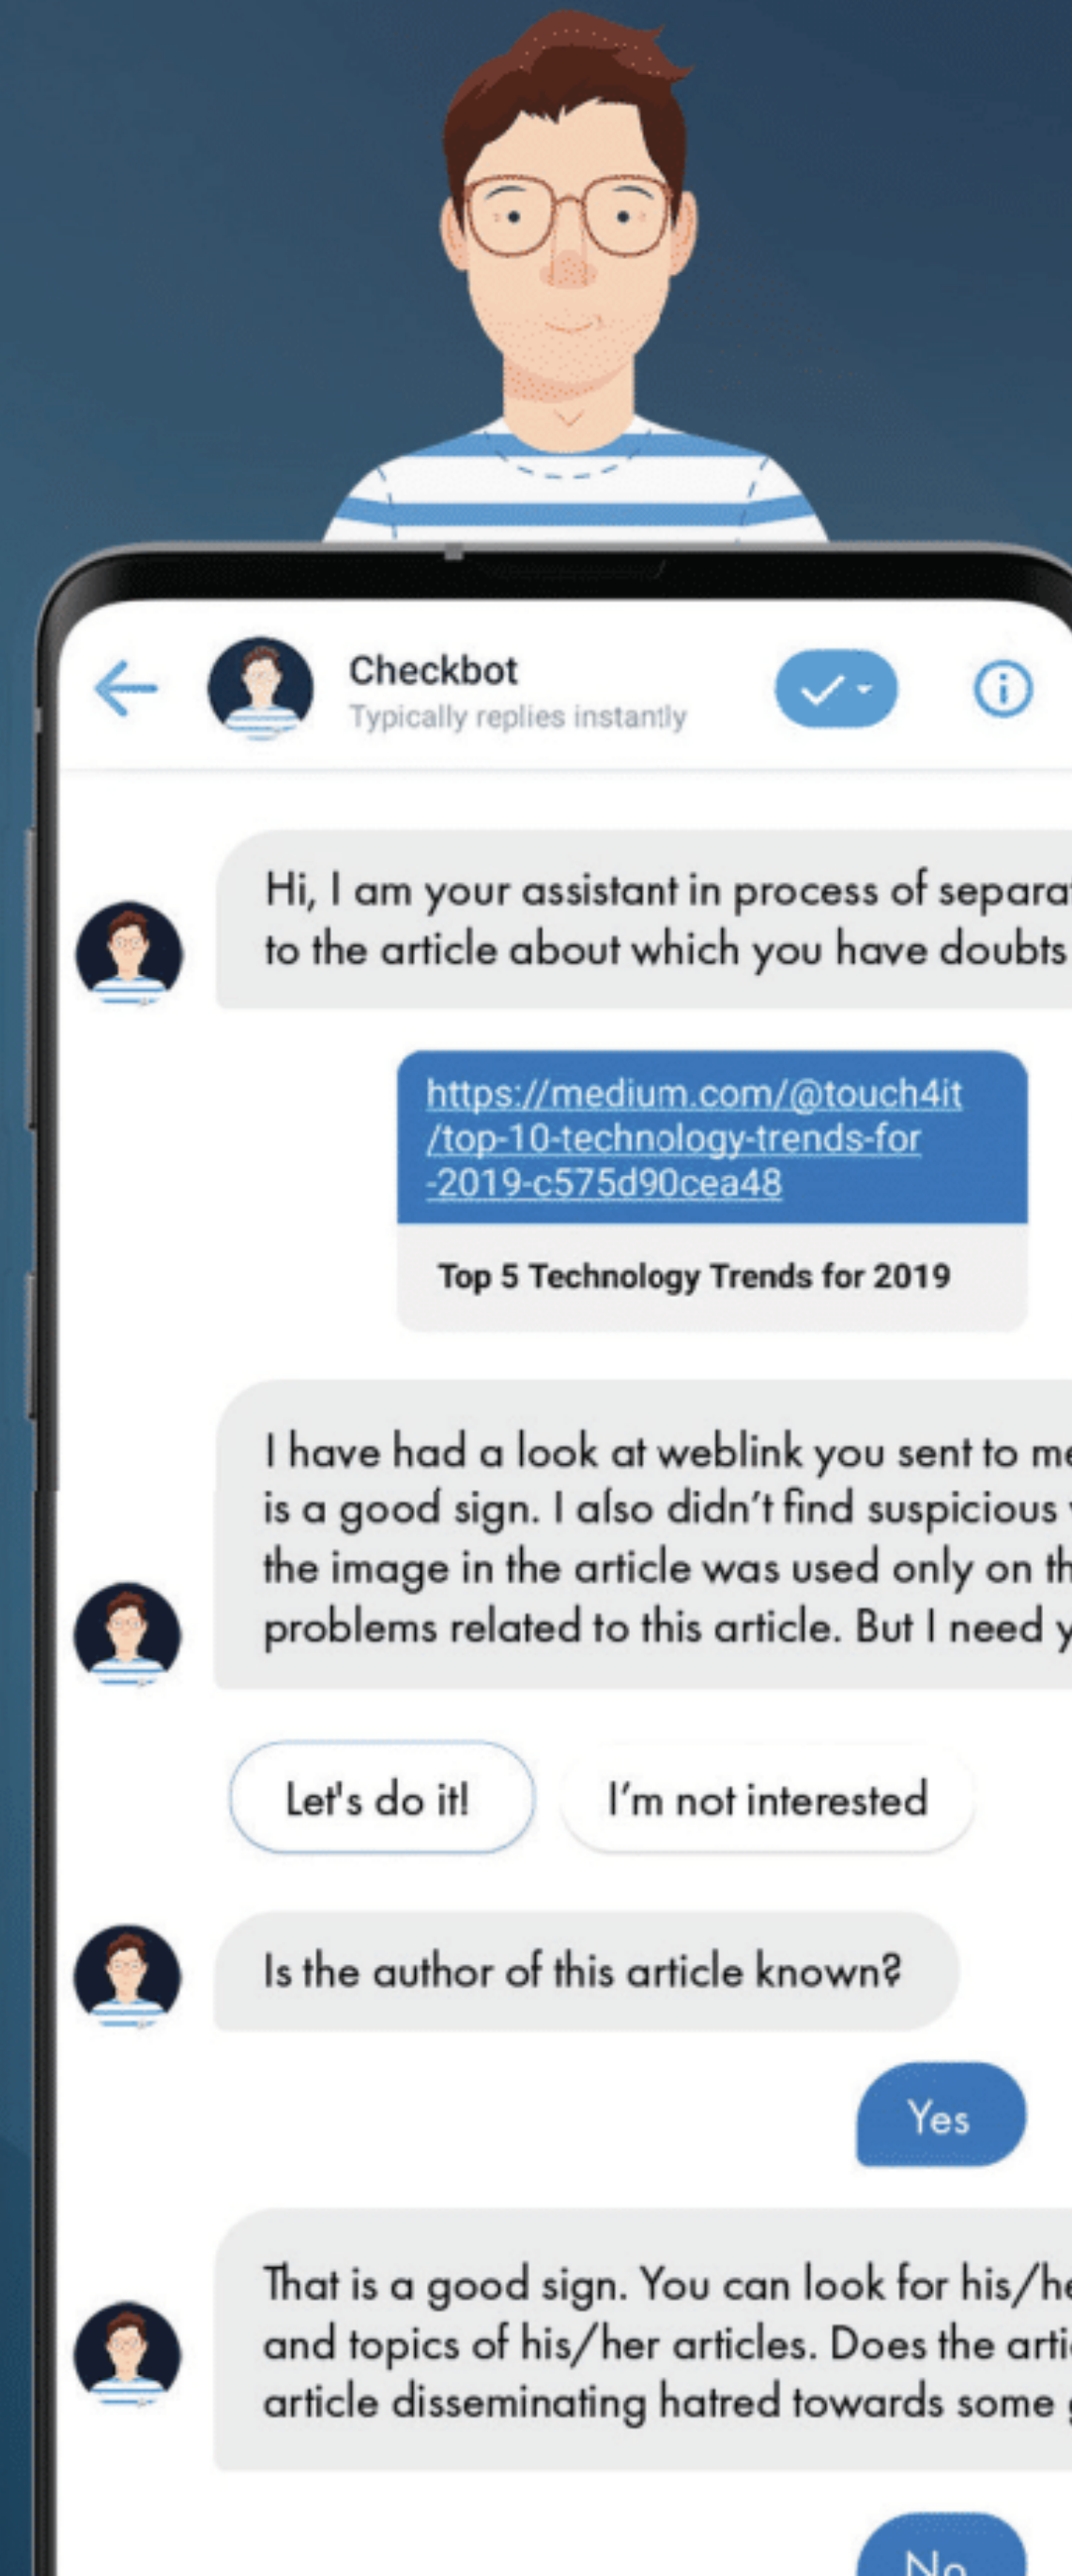

An innovative, interactive product configurator that helps clients to customize a car according to their preferences.

A Hoax-Fighting Chatbot

In cooperation with Seesame agency, we have developed a messenger bot for the Lithuanian and Slovak markets, which helps to prevent the spreading of fake news and hoaxes.

www.checkbot.sk

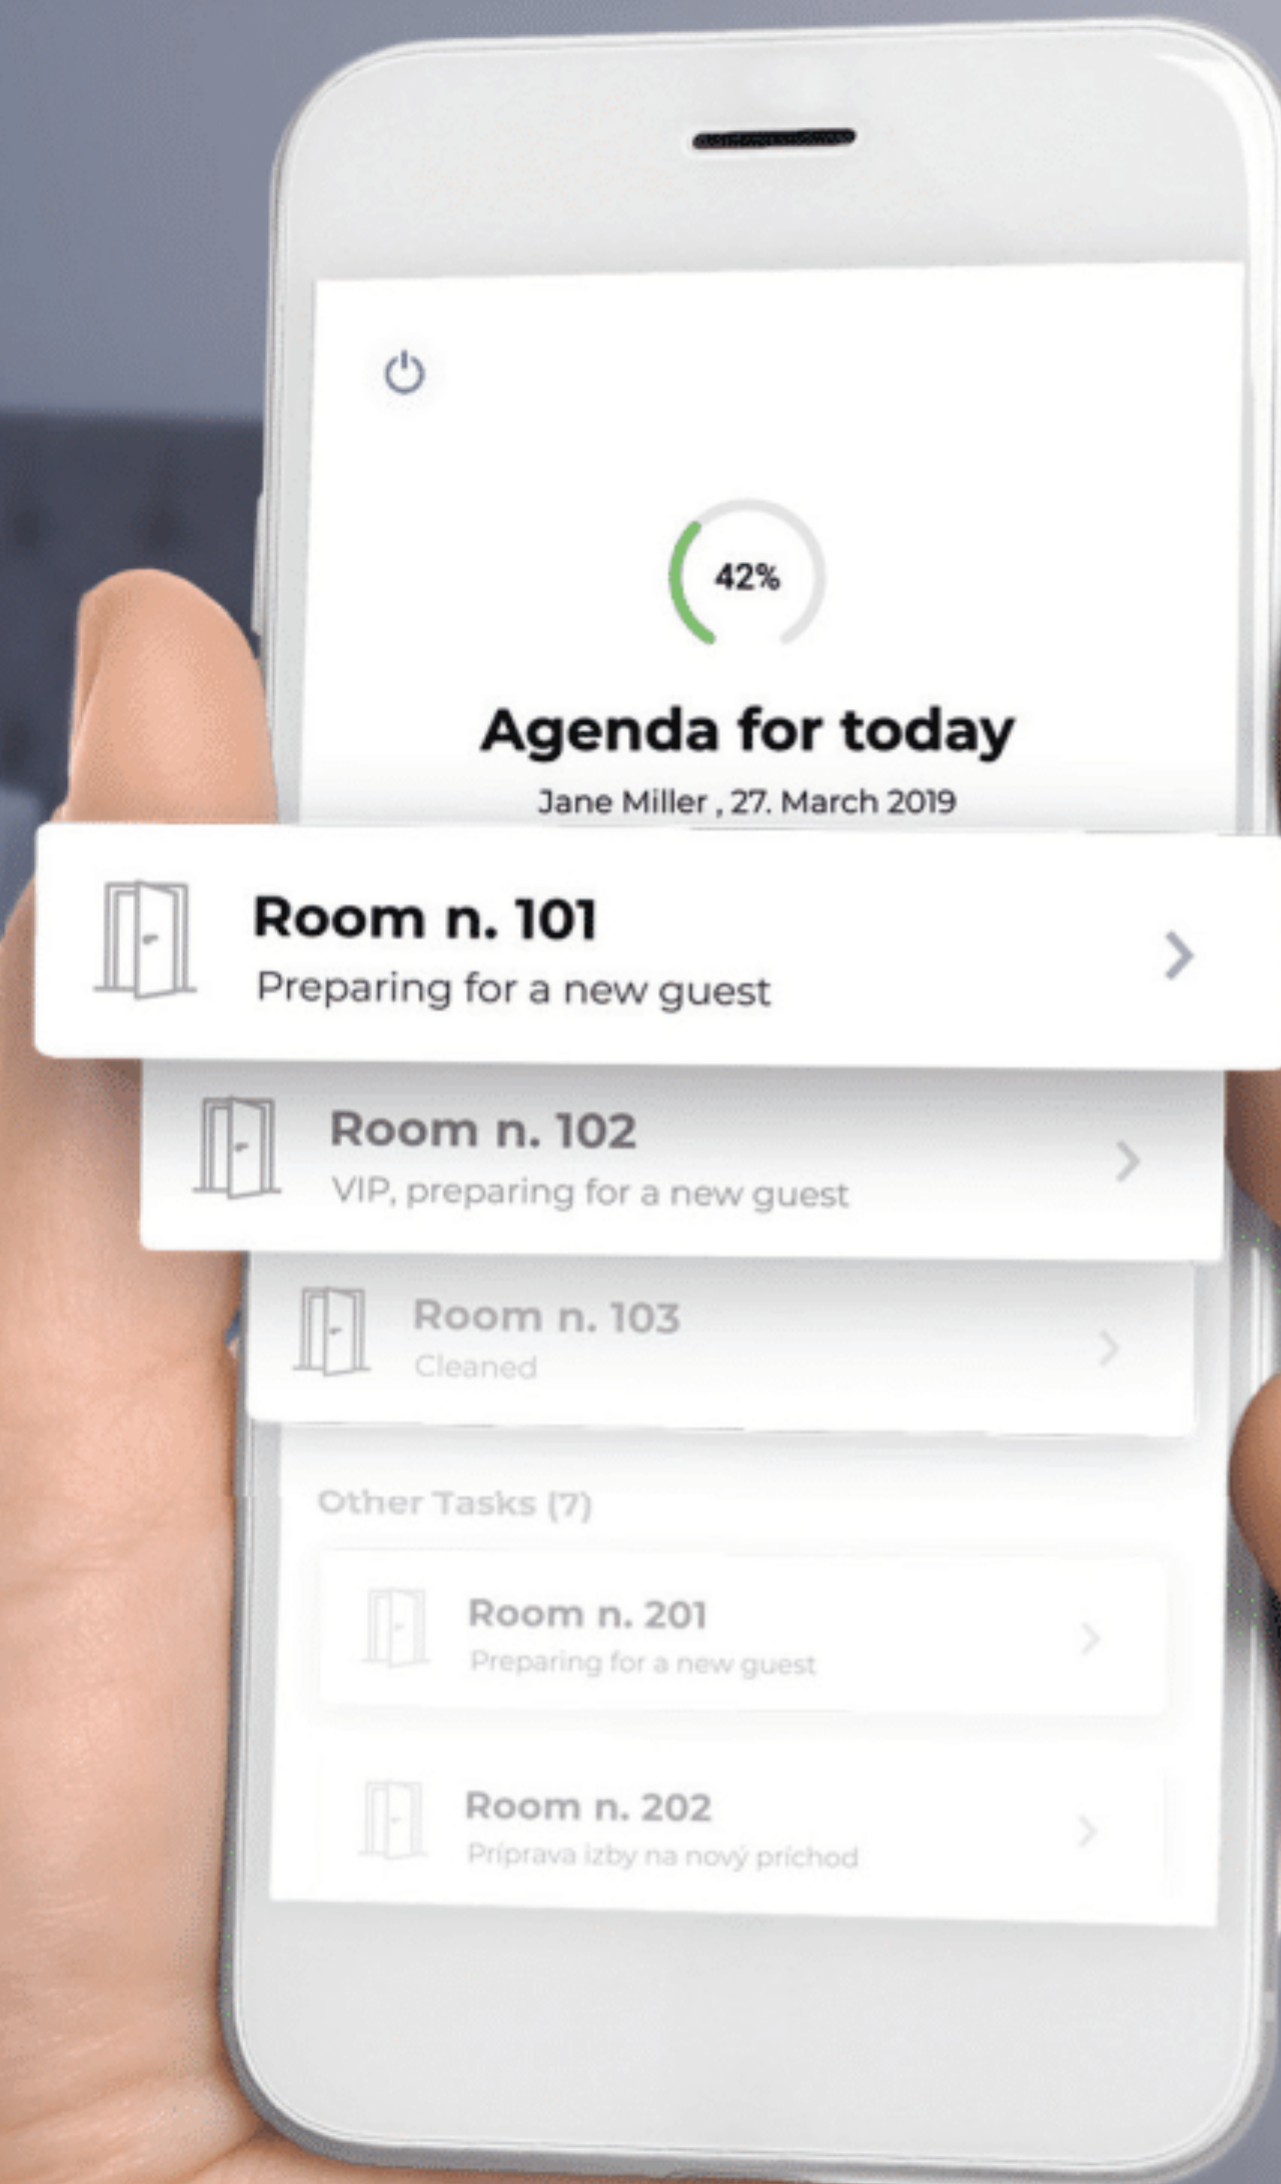

Interpreter Assistant For The Deaf

In cooperation with Slovak Telekom and Pontis Foundation, we have developed an online interpreter to help the deaf in their everyday lives. The system helps them with their translating needs.

App For Hotel Managers And Chambermaids

Based on the best UX/UI practices, this handy assistant app streamlines the management of housekeeping in hotels.

UX | UI | Android | iBeacon | Game

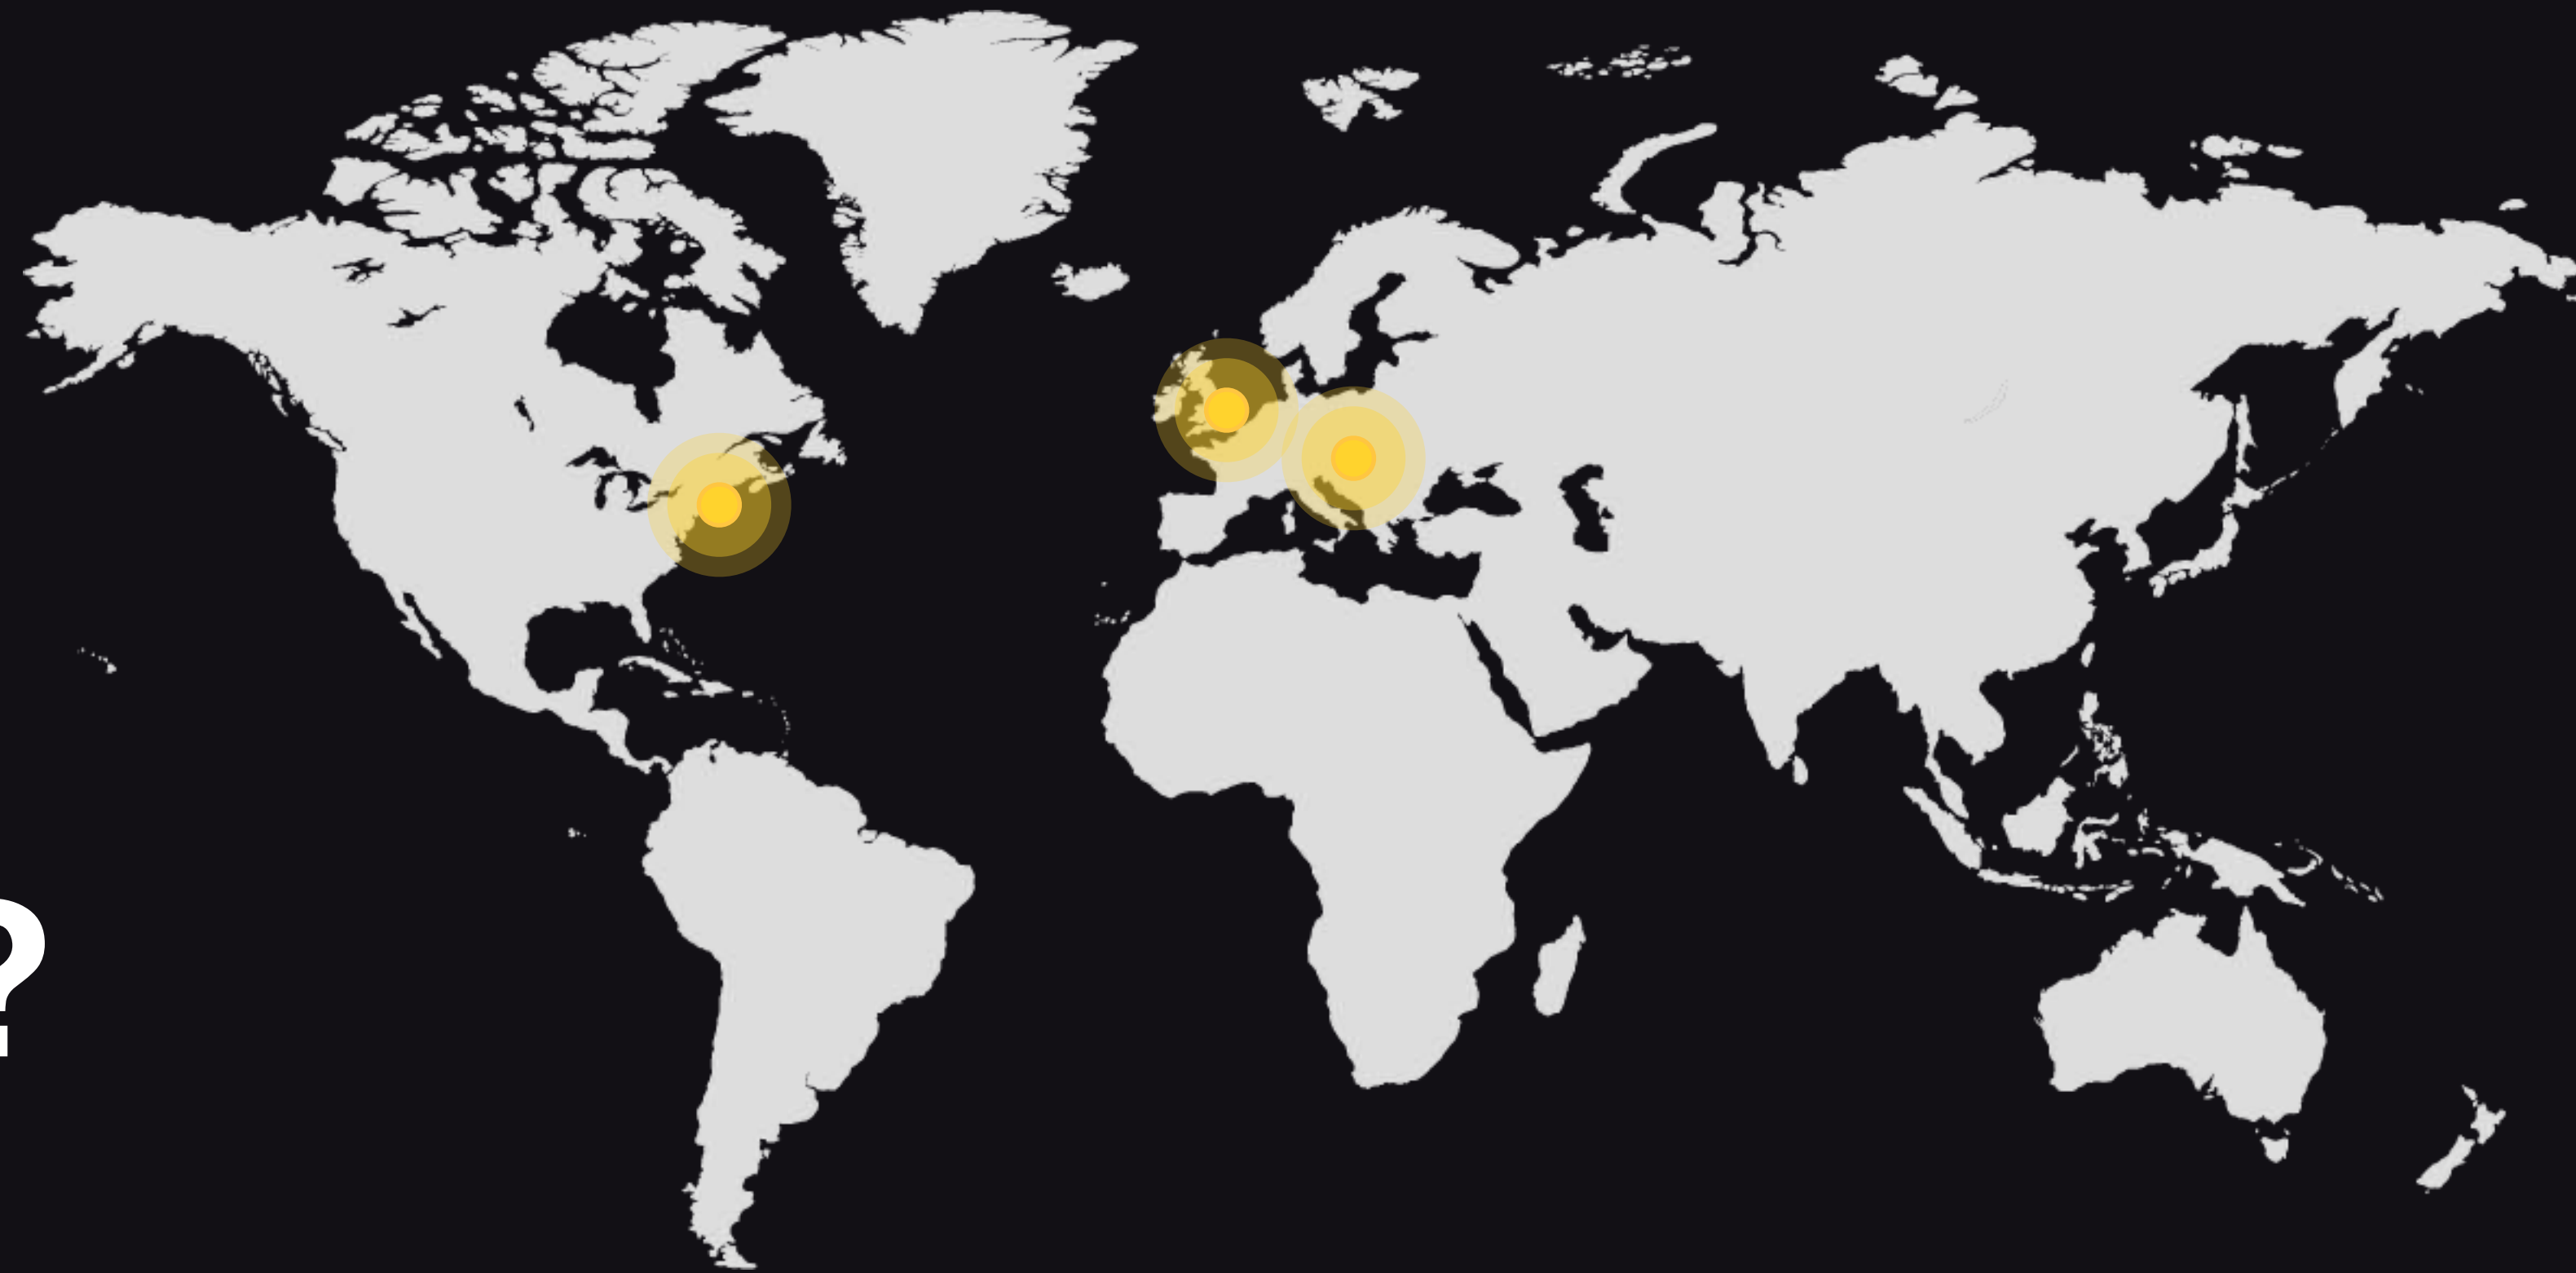

SpyCamp Mobile Game With iBeacon Technology

SpyCamp is an interactive mobile game based on iBeacon technology in the style of spy movies. It tracks the player's location to let them progress in the game.
